WHEREAS, the condition of many pieces of operating equipment in the Department of Public Works, Solid Waste Division, is uneconomical to maintain and repair and particularly unsafe for continued operation; and,

WHEREAS, establishing ownership in regularly required equipment permits reduced operating costs while developing equity interest; and,

WHEREAS, limited requirements exist now for improvement to facilities; and,

WHEREAS, sufficient funds are not presently available from operating revenues to implement the planned equipment replacement program and facility improvements required for the Solid Waste Division; and,

WHEREAS, increasing the service fees for use of disposal facilities operated by the Solid Waste Division included an expenditure provision for repayment of bonds issued for equipment and facilities; and,

WHEREAS, significant time is required to establish equipment specifications, to advertise bids, to evaluate and establish actual acquisition costs, and to prepare, authorize and sell Limited General Obligation Bonds,

NOW, THEREFORE, be it moved by the Council of King County:

That the Council declares its intent to authorize Limited General Obligation Bonds not to exceed \$975,000 for new and used replacement equipment and for facility improvements in the Solid Waste Division, and that the County Executive is hereby requested

1 to take action necessary to secure bid solicitation and bond
2 ordinance preparation.
