## PUBLIC SAFETY SURVEY

Most of the regional service center questions relevant to Public Safety could not be answered by reviewing records or computer data bases. Therefore, Public Safety's downtown and non-downtown offices were surveyed regarding the regional service center concept. A copy of the survey questionnaire is attached to this packet. A Public Safety Organization Chart is also attached for reference. It shows which Public Safety offices are downtown and which aren't.

The results summarized herein and the preliminary conclusions below represent individual responses from Department members. They do not, necessarily, represent Public Safety's position on this very complex issue.

Booking data from the surveys was not deemed reliable. Adult Detention, however, is preparing computer-generated data by region.

### PRELIMINARY CONCLUSIONS (from survey only)

- ° Public Safety's downtown offices collectively make up approximately 90% of the Department's non-booking, in-person contacts with the downtown agencies being studied (i.e., Adult Detention, Superior Court, Prosecutor, Public Defender and Judicial Administration) and most of these are made by the Department's Criminal Investigations Division.
- ° Public Safety's non-downtown offices make up the remaining 10% of the non-booking, in-person contacts with these agencies.
- ° At least 80% of the non-booking trips downtown by Public Safety's non-downtown staff are unrelated to the downtown agencies being studied (i.e., Adult Detention, Superior Court, Prosecutor, Public Defender and Judicial Administration). They are made for meetings, vehicle maintenance, mail pick-up, etc.

### SUMMARY OF PUBLIC SAFETY SURVEY COMMENTS

Responses to questions 5 to 11 of the survey questionnaire are summarized below. Comments clearly depended upon whether the staff member was assigned downtown or to an outlying area. Responses are, therefore, divided into these two groups.

Please note. This is only a summary of individual responses. It does not, necessarily, represent Public Safety's position on the regionalization issue.

#### Responses from Public Safety's Downtown Staff:

- Public Safety's downtown staff listed more negative impacts than positive for partial relocation or expansion of Adult Detention, Superior court, the Prosecutor, Public Defender and Judicial Administration.
- Public Safety's downtown staff felt that careful planning and improved fax and telecommunications equipment could reduce these negative impacts to Public Safety. However, they felt that some additional Public Safety staff would still be required to accommodate regionalization.
- Suggestions for moving downtown Public Safety offices to a regional center were motivated primarily for reasons extraneous to the regionalization issue (need for more space, better parking, etc.) or to accommodate moves by Adult Detention, Superior Court or the Prosecutor. Otherwise, little need to regionalize the downtown offices was expressed.
- Responses strongly indicated that Public Safety does not currently have the staff to transport prisoners from a book and hold facility to the main jail facility. They felt that it should be the responsibility of Adult Detention.

#### Responses from Public Safety's Non-Downtown Staff:

- Public Safety's non-downtown staff listed more positive impacts than negative for partial relocation or expansion of Adult Detention, Superior Court and the Prosecutor. They were particularly positive about potentially having a closer booking facility.
- Non-downtown offices saw some value in being housed with courts, prosecutor and jail in a regional center, but the interest was mild.
- Responses strongly indicated that Public Safety does not currently have the staff to transport prisoners from a book and hold facility to the main jail facility. They felt that it should be the responsibility of Adult Detention.

SURVEY QUESTION #3

**HOW MANY OF THE FOLLOWING DOES YOUR GROUP PARTICIPATE IN DURING ONE YEAR  
(WITH CURRENT WORKLOADS)?**

Answers to this question are contained in the following 3 pages:

Each of the next 3 pages contains the same data but it is broken down differently:

Page 4 - By region

Page 5 - By Public Safety assignment

Page 6 - Includes partial breakdown of Public Safety's downtown offices

Note: Survey questions 1 and 2 were simply used to identify unit and person responding to questionnaire.

GRAND TOTAL: 13,850 in person contacts per year or 1,154 per month.

\* Includes only in-person contacts in downtown offices. Phone contacts and contacts made elsewhere (e.g., at district courts) are not included. Numbers were estimated from survey of and interviews with Department staff. They are rough estimates. They assume current office locations, workload and staffing.

\*\* This number will change dramatically if Public Safety takes over fingerprinting responsibilities in the Jail.

| <b>TOTALS:</b>                  | <b>9,850/821</b>                            | <b>1,335/111</b>                     | <b>1,115/93</b>                              | <b>1,550/129</b>                 |
| <b>% OF GRAND TOTAL</b>         | <b>71.1%</b>                                | <b>9.6%</b>                          | <b>8.1%</b>                                  | <b>11.2%</b>                     |

GRAND TOTAL: 13,850 in person contacts per year or 1,154 per month.

\* Includes only in-person contacts in downtown offices. Phone contacts and contacts made elsewhere (e.g., at district courts) are not included. Numbers were estimated from survey of and interviews with Department staff. They are rough estimates. They assume current office locations, workload and staffing.

\*\* This number will change dramatically if Public Safety takes over fingerprinting responsibilities in the Jail.

9/13/90

SURVEY QUESTION #4

FOR WHAT OTHER REASONS DO MEMBERS OF YOUR GROUP COME DOWNTOWN?  
PLEASE DO NOT INCLUDE ITEMS ALREADY ACCOUNTED FOR IN QUESTION #3.  
NOTE: GROUPS LOCATED DOWNTOWN SHOULD SKIP THIS QUESTION.

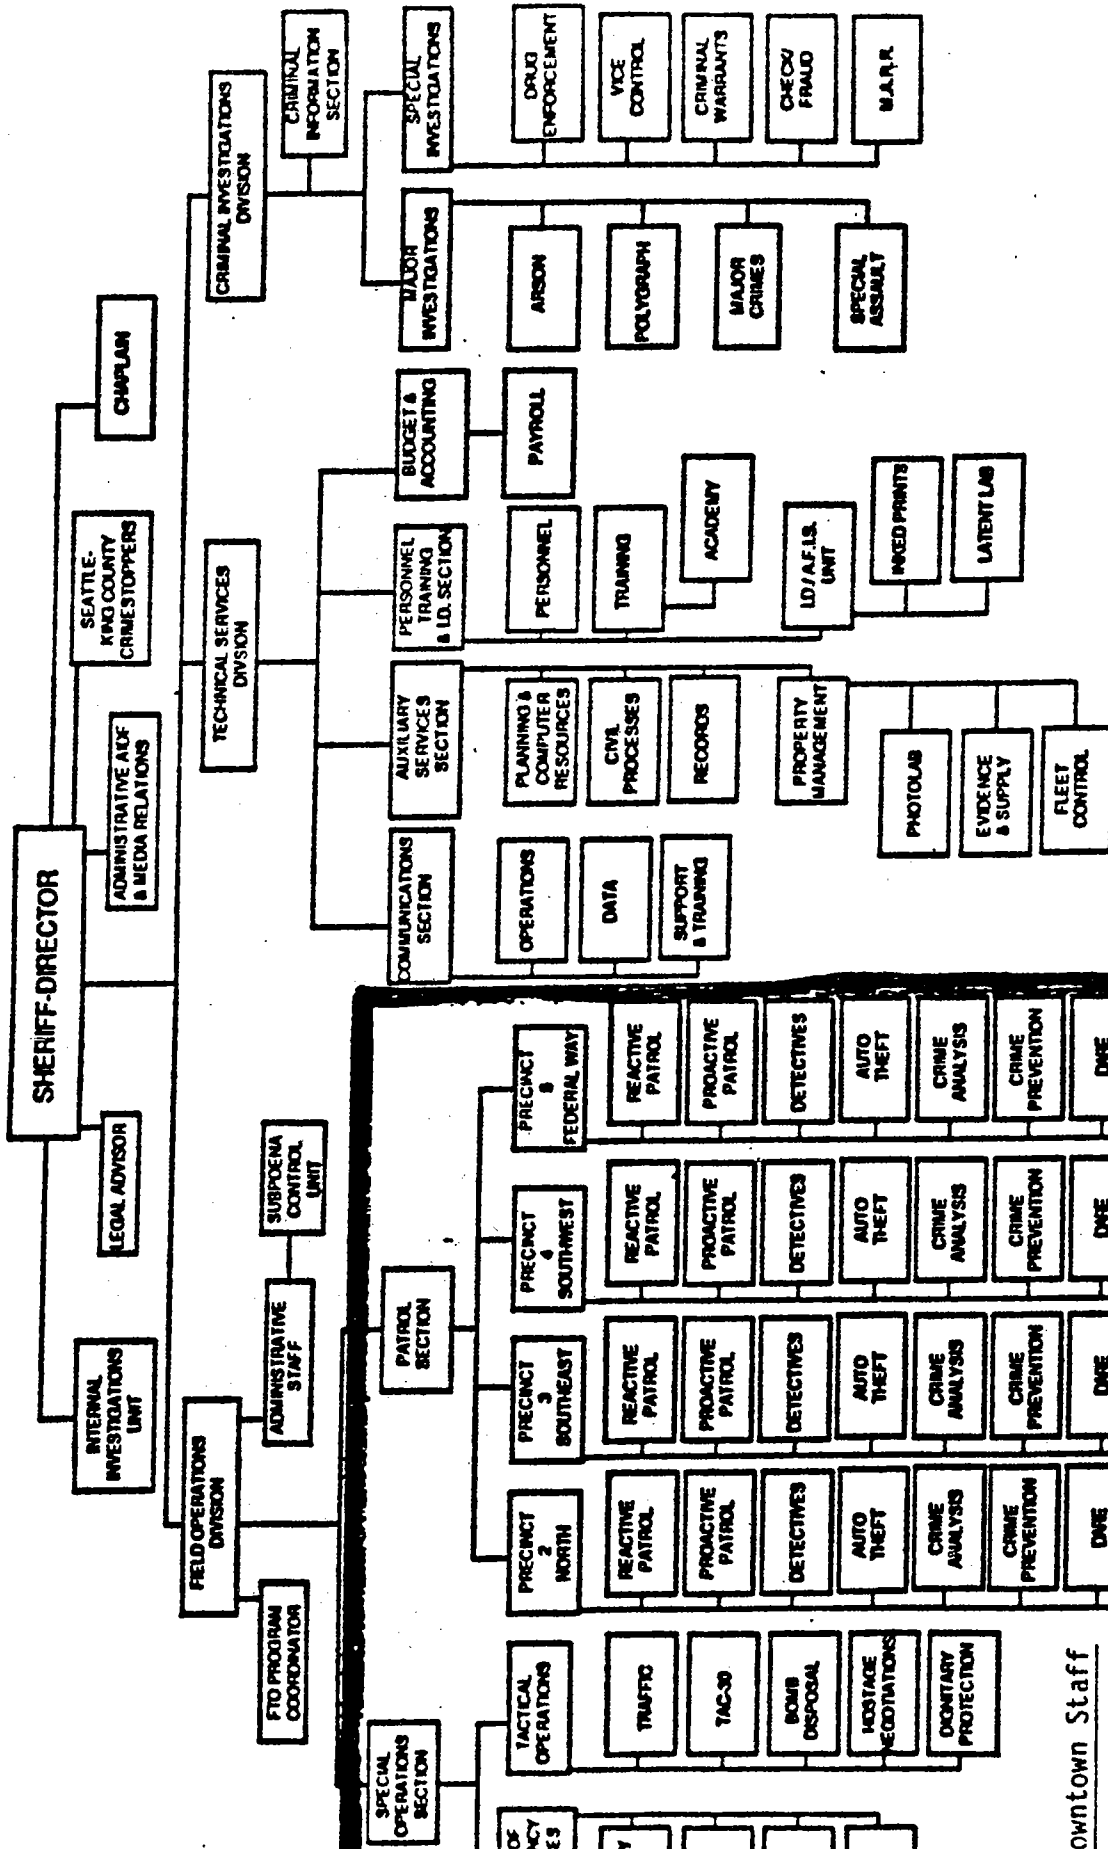

OTHER TRIPS TO DOWNTOWN SEATTLE AREA  
BY PUBLIC SAFETY STAFF \*

| <u>REASON</u>   | <u>TRIPS PER YEAR</u> |
|---|-----------------------|
| Vehicle Maintenance   | 3,500 or more         |
| Mail Pick-up/delivery   | 2,500 or more         |
| Trips to Juvenile Detention/Court   | 500 or more           |
| Department meetings   | 500 or more           |
| Trips to Detox  | 400 or more           |
| Misc.<br>(includes Washington State Crime<br>Lab, Oral Boards, Evidence &<br>Supply pick-up and delivery,<br>Harborview, DSHS, Seattle<br>District Court, etc.) | 400 or more           |
| TOTAL:  | 7,800 (at least)      |

\* Includes only staff assigned outside of Seattle. Does not include contacts with Adult Detention, Superior Court, Prosecutor, Public Defender or Judicial Administration.

Numbers were estimated from survey of and interviews with Department staff. They are rough estimates and, I'm sure, underestimates. They assume current office locations, workload and staffing.

Approximately 320 assigned (July 1990)

8/2/90

PUBLIC SAFETY SURVEY

Background

King County is examining the feasibility of decentralizing some of its law, safety and justice functions by establishing a regional justice service center (or centers). Consideration is being given to locations (or a combination of locations) in the northern, eastern and southern areas of King County. Information obtained from the attached survey will be used to analyze this regional justice service center concept.

Instructions

- Please complete this survey for the following group (or individual):
  
- If the group identified above is large (e.g., Precinct 4 Reactive Patrol), it may be difficult for you to answer questions 3 and 4 on the form. In that case, I suggest:
  1. Subdividing this group and having each subdivision complete a separate form, or
  2. Distributing questions 1 through 4 to all individuals in the group and (after adding up their responses) placing the totals on this form.

Please return completed surveys to Daryl Clark, Planning Unit, Room W-150 King County Courthouse, by Monday, August 20th, if possible. Daryl can be contacted at 296-4076, if you have questions.

QUESTIONS

1. For what group (or individual) is this survey being completed?  
(Please note: answers to the survey questions should apply only to this group or individual.)

2. Who is completing this form? Name \_\_\_\_\_ (print)  
Phone number \_\_\_\_\_

3. How many of the following does your group participate in during one year (with current workloads?)

| <u>LOCATION OF EVENT:</u>                    | <u>EVENT:</u>           | <u>FREQUENCY:</u> | <u>AVERAGE # OF GROUP MEMBERS ATTENDING EACH TIME:</u><br>(NOTE: If you are completing this survey for yourself only, as opposed to a group, you can ignore this column). |
|--|-------------------------|-------------------|---|
| Adult Detention                              | Bookings                | _____             | _____   |
|  | Line-ups                | _____             | _____   |
|  | Prisoner Interviews     | _____             | _____   |
|  | Prisoner Fingerprinting | _____             | _____   |
|  | Meetings over 1/2 hour  | _____             | _____   |
|  | Meetings under 1/2 hour | _____             | _____   |
| Superior Court                               | Appearances             | _____             | _____   |
|  | Meetings over 1/2 hour  | _____             | _____   |
|  | Meetings under 1/2 hour | _____             | _____   |
| Prosecutor                                   | Meetings over 1/2 hour  | _____             | _____   |
|  | Meetings under 1/2 hour | _____             | _____   |
| Public Defender                              | Meetings over 1/2 hour  | _____             | _____   |
|  | Meetings under 1/2 hour | _____             | _____   |
| Judicial Administration/Superior Court Clerk | Meetings over 1/2 hour  | _____             | _____   |
|  | Meetings under 1/2 hour | _____             | _____   |

Other - Please list any other visits to the 5 agencies listed above.

|       |       |       |       |

| _____ | _____ | _____ | _____ |

4. For what other reasons do members of your group come downtown?  
Please do not include items already accounted for in question #3.  
NOTE: GROUPS LOCATED DOWNTOWN SHOULD SKIP THIS QUESTION.

| <u>REASON</u> | <u>FREQUENCY</u> | <u>AVERAGE # OF GROUP MEMBERS PER VISIT</u> |
|---------------|------------------|---|
| _____         | _____            | _____                                       |
| _____         | _____            | _____                                       |
| _____         | _____            | _____                                       |

5. In what ways would your group be affected if the agencies listed below partially relocated or expanded to a regional justice service center? (For this question, assume that your group stays in the current location.)

**ADULT DETENTION**

**Positive Impacts:**

**Negative Impacts:**

**SUPERIOR COURT**

**Positive Impacts:**

**Negative Impacts:**

**PROSECUTOR**

**Positive Impacts**

**Negative Impacts**

**PUBLIC DEFENDER**

**Positive Impacts**

**Negative Impacts**

**JUDICIAL ADMINISTRATION/SUPERIOR COURT CLERK**

**Positive Impacts**

**Negative Impacts**

6. Please list alternatives or ideas that might reduce the negative impacts listed in question 5 (e.g., phone conferencing in lieu of meetings, use of fax machines, etc.)

| <b>AGENCY</b> | <b><u>Alternative that might reduce negative impacts listed in Question 5</u></b> |
|---------------|---|
|---------------|---|

Adult Detention

Superior Court

Prosecutor

Public Defender

Judicial Administration/Superior Court Clerk

7. One option being considered would utilize 72 hour book and hold facilities in addition to and separate from the main detention facility. The prisoner would be transported to the main facility after arraignment.

What impact would this option have on your group and your group's interaction with newly arrested verses post-arraignment prisoners? (For example, before visiting a prisoner you might have to call to determine which facility is holding him).

- a. Impact if King County is responsible for transporting prisoner from book and hold to main facility.

- b. Impact if Adult Detention is responsible for transport.

8. What are the pros and cons of moving or expanding your group to a regional justice service center?

Pros

Cons

---

9. Do you think it makes sense to move or expand your group to a regional justice service center? Why?

10. Do you think it would be cost-effective to move or expand your group to a regional service center? Why?

11. Do you have any other "words of wisdom" or ideas relative to this regional justice service center concept?

Thank you for completing this survey.

Please return completed surveys to Daryl Clark, Planning Unit, Room W-150 King County Courthouse, by Monday, August 20th, if possible. Daryl can be contacted at 296-4076, if you have questions.

PUBLIC SAFETY

Answers to additional questions\*

1. What is the staffing and location of the Criminal Investigation Division (CID) units?

Please see Attachment 1

2. Which CID units make the most contacts with the Prosecutor?

| <u>Unit</u>          | <u>Total Contacts Per Month</u> | <u>Contacts Per Person/Per Month</u> |
|----------------------|---------------------------------|--------------------------------------|
| Special Assault Unit | 300                             | 16                                   |
| Check/Fraud Unit     | 75                              | 8                                    |
| Major Crimes         | 50                              | 3                                    |

All of the contacts are in person. Approximately 60% of them are less than 1/2 hour in length and approximately 40% of them are longer than 1/2 hour. They consist, primarily, of case consultation and preparation.

(Also note - the Drug Enforcement Unit has a full-time Prosecutor assigned with an office in Public Safety.)

3. Which CID units make the most contacts with Superior Court?

| <u>Unit</u>          | <u>Total Contacts Per Month</u> | <u>Contacts Per Person/Per Month</u> |
|----------------------|---------------------------------|--------------------------------------|
| Warrants Unit        | See Attachment 2                |                                      |
| Check/Fraud Unit     | 17 (appearances)                | 2                                    |
| Special Assault Unit | 14 (appearances)                | 1                                    |

4. Which CID units make the most contacts with the jail (excluding bookings)?

| <u>Unit</u>          | <u>Total Contacts Per Month</u> | <u>Contacts Per Person/Per Month</u> |
|----------------------|---------------------------------|--------------------------------------|
| Special Assault Unit | 100                             | 5                                    |
| Major Crimes         | 25                              | 2                                    |
| Check Fraud Unit     | 20                              | 2                                    |

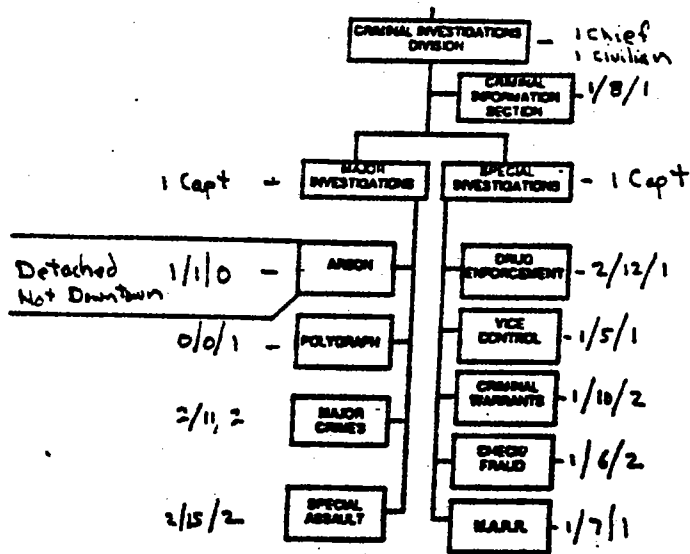

Approximately 90% of these contacts are for prisoner interviews and approximately 10% are for lineups.

\* Based on survey of Department. All figures are rough estimates.

OFFICE OF PUBLIC DEFENSE

Preliminary Conclusions

Questions 1 - 5: Data for these questions was gathered from a survey of defender staff conducted during one week in August, 1990.

What type of contact do attorneys and other defender staff require with inmates of the King County Jail, out-of-custody defendants, prosecutors, court and judicial administration staff, and law enforcement personnel outside of court appearances?

- Defender attorneys, investigators, and other staff make nearly as many visits to the King County Jail to meet with clients as they have non-jail contacts with out-of-custody defendants and other criminal justice system personnel.
- A decentralized jail and/or court would significantly effect defender attorneys in terms of either travel or relocating offices.
- 87% of jail contacts occur prior to trial as defender staff meet with and interview clients while preparing cases.

Question 6: Data for this question comes from OPD interview forms and log sheets from June, 1990.

How many applicants are screened in each location?

- Downtown Seattle interview locations currently process nearly 90% of defendants requesting public defenders in King County.
- Excluding Seattle, the majority of defendants requesting public defenders (64%) come from Region II (Aukeren, Federal Way, and Southwest).

Question 7: Data for this question comes from OPD interview forms from June, 1990.

How many defendants are identified by staff as requiring translation services, by language and location?

- Spanish and Vietnamese are the languages most often requested when translation services are required.
- Outside of Seattle, the bulk of translation services required are in south King County, Regions II and IV (Renton).

note: Many defendants requesting a public defender have enough English to provide the necessary financial information during the interview. Many of these defendants subsequently require translation services as it becomes apparent during the adjudication process that they don't speak English sufficiently well to understand their public defenders or court staff and procedures.

Intergovernmental Workgroup  
DATA COLLECTION ASSESSMENT

Agency: Office of Public Defense

Data Question # 1 - 5

Page #             
(refer to Data Analysis Display Formats packet)

\*How does the collected data answer the question?

very well

fairly well

not well at all

\*What analytical/policy/decision questions does this collected data assist in answering (refer to draft #6 of data analysis questions)?

Type and location of contacts defender staff and translators have with Office of Public Defense (OPD) clients.

\*What conclusions/findings can be drawn from the collected data?

Defender staff make nearly as many visits to the jail as they see clients outside of court. Decentralized jail siting would significantly effect defender attorneys, and to a lesser degree, investigators and social workers interacting with defendants.

\*Category "Attorney" includes several Rule 9 legal interns who function as defender attorneys under supervision.  
 \*\*Category "Investigator" includes actual defender agency investigators, jail interviewers, and various types of paralegals who have client contact.  
 \*\*\*The number of hours is greater than can be attributed to OPD staff. OPD arranges for and schedules non-OPD interpreters to provide translation services in the Superior Court.

Intergovernmental Workgroup  
DATA COLLECTION ASSESSMENT

Agency Office of Public Defense

Data Question # 6

Page # \_\_\_\_\_  
(refer to Data Analysis Display Formats packet)

\*How does the collected data answer the question?

very well

fairly well

not well at all

\*What analytical/policy/decision questions does this collected data assist in answering (refer to draft #6 of data analysis questions)?

Numbers and locations of defendants needing financial screening.

\*What conclusions/findings can be drawn from the collected data?

Region II has more screening than any other region, except Region I. In order to accommodate the most defendants possible, a decentralized jail/court site ought to be accessible to Region II, South.

| <b>TOTAL</b>           | <b>3238</b> | <b>659</b>                               |        |                                    | <b>3238</b>           |                  |

\*June appears to be a typical month for number of interviews. In 1989, OPD interviewed an average of 3037 applicants per month. Through the first 6 months of 1990, OPD interviewed an average of 3241 applicants per month.

\*\*Dept. 7 numbers are from July rather than June. OPD began interviewing in Dept. 7 in mid-June, 1990. The first full month of interviews was July, 1990. Note that Dept. 7 is located in the jail.

\*\*\*All but 3 of the Region I defendants were from Seattle District Court. Given that, the geographic distribution of defendants is as follows:

|                        |             |        |
|------------------------|-------------|--------|
| King County            | 397         | 12.26% |
| (outside Seattle)      |             |        |
| Seattle                | 2841        | 87.74% |
| (Incl Seattle Dist Ct) |             |        |
| <b>Total</b>           | <b>3238</b> |        |

\*\*\*\*Includes Seattle Muni, Dept 7, Superior, and Juvenile Courts.

Intergovernmental Workgroup  
DATA COLLECTION ASSESSMENT

Agency: Office of Public Defense

Data Question # 7

Page # \_\_\_\_\_  
(refer to Data Analysis Display Formats packet)

\*How does the collected data answer the question?

- very well  
 fairly well  
 not well at all

\*What analytical/policy/decision questions does this collected data assist in answering (refer to draft #6 of data analysis questions)?

Location of defendants needing translation services.

\*What conclusions/findings can be drawn from the collected data?

The largest percentage of defendants needing translation services outside of Seattle is in Region II, South. Any decentralized jail/court siting needs to take into account the need for translation services, especially in Region II.

QUESTION 7  
 TRANSLATION NEED BY LOCATION\*  
 Percent of total applicants interviewed initially  
 identified as needing translation services.

|            | OPD   | JAIL  | SMC (Seattle) | REGION I (South) | REGION II (NE) | REGION III (Renton) | REGION IV (Issaquah) | REGION V | TOTAL | 1990 Client # (Est)** |

|---|--|-------------------------|
| 1. What will the source of care be for needs which cannot be met in the KCCF?   | Many options for hospital care exist in the community outside of downtown Seattle. Most areas of King Co. have the types of health care services necessary if the decision is made to not have care solely provided at Harborview and University Hospitals.  | 5-7                     |
| 2. What types of services are referred to outside facilities?   | <p>In the 2nd quarter of 1990, 300 transports to outside facilities were made. The bulk (33%) of these were for emergency services. 95% of the emergency transports occurred after jail health service clinic hours and on the weekend.</p> <p>Of the remaining (66%) transports, 10% went to oral surgery; 9% of to orthopedic specialty care, 6.3% to radiology for diagnostic procedures and 5.7% to OB services.</p> <p>The range of outside services utilized is very broad and included over 18 types of specialties.</p>  | 8                       |
| <p>3. What type and number of staff, facilities, and services are necessary to provide care at each type of facility?</p> <p>What percent of booked individuals need health care?</p> <p>What level of health care do patients need, and when do they need it? (length of stay)</p> | <p>A. In 100 randomly selected medical records:</p> <ol style="list-style-type: none"> <li>1) 30% of the sample population is seen by Jail Health Services staff at booking</li> <li>2) 79% of the sample population received health services during the first 14 days of incarceration</li> <li>3) 70% of care was provided in the first 4 days, and 92% of care was provided in the first 8 days of incarceration.</li> <li>4) 6% of the sample required detoxification for substance abuse</li> <li>5) 4% of the sample required specialized psychiatric housing</li> </ol> <p>B. Of those booked with booking sheets in April and June, 1990:</p> <ol style="list-style-type: none"> <li>1) 2% of this population were refused booking for medical reasons.</li> <li>2) 32-35% of this population needed health services at booking.</li> <li>3) 3-4% of this needed psychiatric services at booking.</li> </ol> | 9-11                    |
|   |  | 12-1                    |

JAIL HEALTH SERVICES

| Question | Conclusions   | Data c<br>attache<br>pages |
|----------|---|----------------------------|
|          | C. Inmates in specialized medical/psych housing appear to have 3 1/2 times higher rate of utilization of clinic services than residents of general housing.   | 14                         |
|          | <p>D. Pharmacy Services:</p> <ol style="list-style-type: none"> <li>1) 18% of the jail population during the week studied was receiving medication.</li> <li>2) On average, 52 new prescriptions were started each day of the study week.</li> <li>3) The most frequently prescribed dosing pattern to inmates is once a day.</li> <li>4) The largest (44%) amount of nursing time was taken in administering the 3 times a day medication.</li> <li>5) On average, during the study period 964 or more doses of medication were provided per day by nursing staff</li> </ol> <p>The number of prescriptions written is determined by a complex set of factors, including the number of nurses available to make referrals and number of patients that are seen at the clinic. Clinic volume is a function of the effectiveness of DAD staff in transporting inmates to clinic and the number of physicians and nurse practitioners - available to see patients. In the month of August at least 13 nurse posts were unfilled and two nurse practitioners positions were unfilled; therefore, these data may be conservative.</p> | 15-17                      |
|          | <p>E. The bulk of services to patients is in 5 categories:</p> <ol style="list-style-type: none"> <li>1) Nursing assessments, 15 min. in duration, to respond to inmate health need, either at booking or in general population (medication administration is not included in this data see pp. 15-17).</li> <li>2) 15 min. assessments by nurse practitioners and physicians either in the infirmary or clinic.</li> <li>3) Dental emergencies and follow-ups.</li> <li>4) Psychiatric initial and follow up evaluations.</li> <li>5) X-ray for medical management.</li> </ol>   | 18                         |

JAIL HEALTH SERVICES

| Question  | Conclusions   | Data<br>attac<br>pag      |
|---|---|---------------------------|
| <p>4. As JHS provides care to a growing population, what changes in level of care need to occur to address aging, and infectious disease (HIV/AIDS, TB, Hepatitis).</p>   | <p>A. The male population, which represents approximately 85% of the jailed population, is growing older. Older people have more health needs of all kinds. Therefore, health services will need to determine how to meet these changing health care needs.</p> <p>B. As the rates of communicable diseases increase, particularly HIV/AIDS, TB and Hepatitis, staffing and costs of health care will increase.</p>   | <p>19</p> <hr/> <p>20</p> |
| <p>5. What type and number of specialized housing units are necessary to appropriately house inmates with health needs in various types of facilities?</p> <p>Specialized housing:</p> <ul style="list-style-type: none"> <li>- Medical-infirmary/isolation</li> <li>- Psych-suicide/group/isolation</li> </ul> | <p>The number of beds in specialized housing (infirmary and psych units) is inadequate to meet current needs.</p> <ul style="list-style-type: none"> <li>- Infirmary capacity is 27 beds; in June the average daily infirmary population was 29. Often the infirmary is crowded to 40-45 people.</li> <li>- Psych housing has a rated capacity of 78 beds; in June, the average daily psych population was 85, sometimes ranging up to 100.</li> </ul> <p>Overcrowding often necessitates prematurely releasing patients from specialized housing to general housing in order to accommodate another patient presenting a higher priority health care need.</p> <p>Data illustrate that 10% of current housing is dedicated to medical and psych housing (this is an inadequate level).</p> <p>D.A.D. data (DAD questions 5A &amp; 5B) point out that 18% of medical housing and 20% of psych housing is in the general population.</p> | <p>21</p>                 |

## JAIL HEALTH SERVICES

### Definitions and Terminology

1. Infirmery: a specialized residential area where inmates, due to medical need, have increased access to health services staff.
2. Clinic: an "outpatient" facility where inmates come in for treatment and thereafter return to their housing unit.
3. Rated Capacity: the number of beds for which the facility was designed.
4. Kite: an inmate's written request for health services.
5. Encounters: a face-to-face service.
6. Indirect Service: dealing with an inmate health concern, but not face-to-face, such as discussing treatment with the family or responding to an Ombudsman call.
7. ADP: average daily population for which Jail Health Services has responsibility. Includes: secure tower, west wing, North Rehab Facility; excludes state beds.
8. NRF: North Rehabilitation Facility, a minimum-security facility in North Seattle. Residents are the health care responsibility of Jail Health Services.

NOTE: Data in this document represent current levels of services provided by Jail Health Services. This current level may not fully meet all health care needs. The goal of King County is to re-establish accreditation of the Jail Health Services program, which will increase the level of services.

Possible referral hospitals for custody facilities located outside of downtown Seattle

Hospitals in the King County that provide: Emergency Services, Specialty Clinics, and Obstetrics to the communities.

A-J: Hospitals that have bed capacity over 100 and specialty service capacity to meet inmate health needs.

- A. AUBURN GENERAL HOSPITAL  
20 Second St. N.E., Auburn, WA 98002  
Michael Gherardini, Administrator  
Beds-119 Admissions-4,554
- B. BALLARD COMMUNITY HOSPITAL  
1507 N.W. Market & Barnes, Box C-70707  
Seattle, WA 98107-1507  
782-2700  
Douglas A. Bruce, Administrator

| ** Other                      | 16   |                | 1            | 17           | 15.6                             |
| TOTAL                         | 265  | 17             | 18           | 300          | 100                              |

\* Seventy-three out of 84 transports to emergency rooms occurred after clinic hours and on weekends.

\*\* "Other" is the total of specialty clinic visits with very small numbers.

\*Indirect is responding to a patient concern but not face-to-face, i.e. family call, Ombudsman call, etc.

Data Source: Encounter forms prepared by each staff which identify the patient and service provided.

## King County Demographic Criminal Justice 'At Risk' Groups

### Demographic Age Patterns

- There is a trend for older males (30+) to be more involved in illegal behavior than ever before.
- The number of persons in the 30-40 year old range within the county's general population is increasing rapidly.
- The younger age groups are decreasing in size, but will grow again beginning in 1992.

King County Jail Population Forecast 1989-2010  
 Department of Adult Detention, King County, Washington  
 Jack P. O'Connell

Data Collection Assessment: Question 4

Counseling and testing for HIV (the virus that causes AIDS: Human Immunodeficiency Virus) is done by Communicable Disease Control staff of Jail Health Services. The majority of those tested voluntarily request this service either on their own or by referral from a health care provider. (A small number of mandatory HIV testing and counseling services are done for court orders and substantial exposure incidents). Those who already know that they are HIV-positive do not usually seek further testing. Those who do not perceive themselves at risk for acquiring the virus are also usually not seeking testing.

Of 418 inmates tested for HIV from January 1 to June 30, 1990, 4.5% were positive; 59% of this group were in the intravenous drug user (IVDU) risk group. This number is not intended to indicate the percentage of HIV-positive individuals in general population. There are no data to clearly estimate the numbers of percentages of HIV-positive inmates, or even those with AIDS (meaning those who do not merely carry the virus but are also showing symptoms). However, it is widely believed that we will see an increase in numbers of HIV-positive inmates and those with AIDS, reflecting broad trends in the general community and among intravenous drug users (IVDU's).

In 1987, JHS housed an occasional AIDS patient in the infirmary. In 1990 there are routinely 4-6 AIDS patients in the infirmary. The level of care required for this population has dramatically changed the nursing and medical care services demands in the infirmary.

The risk behaviors that can transmit HIV are the same as those that can transmit Hepatitis B (as well as other forms of Hepatitis called "C" and "Non-A Non-B"). Therefore, Jail Health Services expects Hepatitis rates to increase along with HIV-positive rates. Treatment for acute Hepatitis B, C, and Non A Non B is supportive, and primarily requires added nursing time.

HIV positive patients are at greater risk of a wide range of other infections (called opportunistic diseases). Tuberculosis can be one such opportunistic disease; standards of care recommend preventive treatment for those with a positive TB skin test.

The increasing median age and communicable disease rates in the jail population therefore mean increased health care costs. At this time, it is difficult to calculate the exact rate of increase in cost.

QUESTION #5

PROSECUTING ATTORNEY  
DATA FORMAT

Question 1

NUMBER OF DEPUTY PROSECUTING ATTORNEYS NEEDED  
SAMPLE YEAR - 1989

| Region | Total # | 1st. Appearance+ | Filing++ | Arraignment+ | Bond+ |
|--------|---------|------------------|----------|--------------|-------|
| 1      | 9       | 2                | 7        | 2            | 2     |
| 2      | 3       | 1*               | 1-2      | 1*           | 1     |
| 3      | 3       | 1                | 1-2      | 1*           | 1     |
| 4      | 3       | 1                | 1-2      | 1*           | 1     |
| 5      | 3       | 1                | 1-2      | 1*           | 1     |

(Estimates based on police referrals from region)

+ 1st Appearance, Arraignment and Bond will require 1 deputy per court room)

++ Filing - 1 deputy can file 6 average cases daily, approx. 1400 per year.

\* Same Deputy

FIGURES LISTED DO NOT INCLUDE SUPPORT STAFF FOR DATA ENTRY, WORD PROS., RECEPTION, OR PARALEGAL

Intergovernmental Workgroup  
DATA COLLECTION ASSESSMENT

Agency PAO

Data Question # 1

Page # 1

(refer to Data Analysis Display Formats packet)

\*How does the collected data answer the question?

X very well

fairly well

not well at all

\*What analytical/policy/decision questions does this  
collected data assist in answering (refer to draft # 6 of data  
analysis questions)?

7, 10, 11

\*What conclusions/findings can be drawn from the collected  
data?

A minimum of three deputy prosecutors would be needed to cover the  
first appearance, rush filing, and arraignment functions of  
a regional justice center.

This question does not address support staff needs.

6

Status of a charged defendant may change from in custody to out of custody, or visa versa, during the period before trial.

The PAO does not keep a sufficient database to provide the answer to question #2.

\*What conclusions/findings can be drawn from the collected data?

N/A

\*What analytical/policy/decision questions does this collected data assist in answering(refer to draft #6 of data analysis questions)?

not well at all

fairly well

very well

\*How does the collected data answer the question?

(refer to Data Analysis Display Formats packet)

DATA COLLECTION ASSESSMENT

Agency PAO

Data Question # 3

Page # 3

(refer to Data Analysis Display Formats packet)

How does the collected data answer the question?

very well

X fairly well

not well at all

\*What analytical/policy/decision questions does this  
collected data assist in answering (refer to draft # 6 of data  
analysis questions)?

7, 11

\*What conclusions/findings can be drawn from the collected  
data?

Due to the nature of the legal work performed by the  
Civil Division, the Family Support Section and the Fraud Divisi  
the percentage of caseload originating in a particular  
region is not easily ascertainable. Nor does the specialized  
function of these sections easily lend itself to decentralizat  
The Special Assault Unit, which is based on the concept of  
vertical prosecution, could more easily be decentralized.  
Notethat Region #1 includes all King County Police SAU  
cases from unincorporated King County.

Intergovernmental Workgroup  
DATA COLLECTION ASSESSMENT

Agency PAO

Data Question # 4

Page # 4

(refer to Data Analysis Display Formats packet)

\*How does the collected data answer the question?

very well

fairly well

not well at all

\*What analytical/policy/decision questions does this  
collected data assist in answering (refer to draft # 6 of data  
analysis questions)?

8, 9, 10, 11, 12

\*What conclusions/findings can be drawn from the collected  
data?

The most serious class of felonies, which would be handled by  
the most experienced deputy prosecutors, constitute but a  
small percentage of the total number of felonies referred.

The numbers under 1(b) represent King County cases, not  
divided by region of origin.

Region 5, by itself, would not warrant the costs of  
decentralization.

Intergovernmental Workgroup  
DATA COLLECTION ASSESSMENT

Agency PAO

Data Question # 5

Page # 5,6,7

(refer to Data Analysis Display Formats packet)

\*How does the collected data answer the question?

Very well

Fairly well

not well at all

\*What analytical/policy/decision questions does this collected data assist in answering (refer to draft #6 of data analysis questions)?

6,8,9,11

\*What conclusions/findings can be drawn from the collected data?

Regions 4 & 5, if combined, still total only about half of the total for region 3 and far less than half of the totals for region 1 and region 2.
