Seattle, WA 98104

Signature Report

March 7, 2017

Ordinance 18472

Proposed No. 2017-0035.1

Sponsors Dembowski and Kohl-Welles

1 AN ORDINANCE relating to the purchase of renewable
2 electricity; authorizing the executive to enter into a long-
3 term agreement for the purchase of renewable, greenhouse
4 gas neutral electricity from Puget Sound Energy.

5 STATEMENT OF FACTS:

- 6 1. Climate change is one of the paramount challenges of our generation.
7 King County is already experiencing the impacts of a changing climate:
8 warming temperatures, acidifying marine waters, rising seas, increasing
9 flooding risk, decreasing mountain snowpack and less water in the
10 summer. Climate change will have long-term consequences for the
11 economy, the environment, and public health and safety in King County.
- 12 2. King County has a long record of innovation, leadership and
13 investment in reducing greenhouse gas emissions and preparing for the
14 impacts of climate change. Consideration of climate change impacts and
15 opportunities to reduce energy use and greenhouse gas emissions are
16 deeply embedded throughout the work plans and capital investments of
17 county departments and lines of business.
- 18 3. Since 2007, investments in energy efficiency and changes in operations
19 have reduced normalized energy use in existing buildings and facilities by

20 more than twenty percent, generating over three million dollars in annual
21 savings.

22 4. King County is now producing renewable energy equivalent to more
23 than one hundred percent of total operational energy use, excluding public
24 transit vehicles.

25 5. The 2015 King County Strategic Climate Action Plan maps specific
26 pathways and actions needed to achieve the ambitious countywide climate
27 goals of reducing greenhouse gas emissions by eighty percent by 2050
28 against a 2007 baseline with interim goals of twenty-five-percent
29 reduction by 2020 and fifty-percent reduction by 2030.

30 6. The Strategic Climate Action Plan establishes goals, targets, measures
31 and priority actions in five goal areas for reducing greenhouse gas
32 emissions: (a) transportation and land use; (b) building and facilities
33 energy; (c) green building; (d) consumption and materials management;
34 and (e) forestry and agriculture.

35 7. While the county surpassed its energy efficiency goal for 2015 and is
36 pursuing additional energy reductions by 2020, reducing greenhouse gas
37 emissions associated with energy supplies through increased consumption
38 of renewable energy and reduced reliance on fossil fuels continues to be
39 an essential strategy for meeting the county's operational and countywide
40 climate goals.

41 8. The Strategic Climate Action Plan calls for increasing the percentage
42 of energy from renewable sources used in county operations, setting a

43 target of consuming renewable energy equal to seventy percent of energy
44 consumed in county operations by 2020 and eighty-five percent by 2025.

45 The plan also calls for all electricity supplied for King County's
46 government operations to be greenhouse gas neutral by 2025. The plan
47 sets a countywide target of increasing renewable electricity supply to
48 ninety percent of delivered electricity by 2030.

49 9. Ordinance 17971 requires the wastewater treatment division and solid
50 waste division to be carbon neutral by 2025. The emissions related to
51 electricity provided by Puget Sound Energy is the largest source of
52 greenhouse gas emissions for the wastewater treatment division and the
53 second largest source for the solid waste division.

54 10. The Strategic Climate Action Plan recommends that the county
55 partner with utilities and others to phase out coal-fired electricity by 2025
56 and support development of increasing amounts of renewable energy
57 resources.

58 11. Within Puget Sound Energy's electricity service area, approximately
59 fifty-nine percent of electricity supply is supplied by carbon-based
60 sources, including thirty-five percent coal and twenty-four percent natural
61 gas.

62 12. As of 2014, sixty-four percent of the county's electricity supply came
63 from renewable sources, compared to the goal of ninety percent by 2030
64 in the Strategic Climate Action Plan.

65 13. King County is a major electricity customer of Puget Sound Energy,
66 purchasing more than ten million dollars a year in electricity to operate
67 county buildings and facilities within Puget Sound Energy's electricity
68 service territory.

69 14. Puget Sound Energy has been a strong partner in helping King County
70 achieve energy efficiency goals through energy conservation rebates and
71 incentives.

72 15. Washington state regulations limit the ability of customers like King
73 County to directly purchase renewable energy from non-utility suppliers.

74 16. King County and cities in King County have requested that Puget
75 Sound Energy expand options for the purchase of renewable energy for
76 customers within its service territory.

77 17. Puget Sound Energy developed and received approval from the
78 Washington state Utilities and Transportation Commission in September
79 2016 for Tariff Schedule No. 139 Voluntary Long Term Renewable
80 Energy, known as Green Direct, offering renewable electricity from a
81 Washington wind facility that will be operational on January 1, 2019.

82 18. Green Direct is available to municipal and large commercial
83 electricity users.

84 19. Qualified customers can contract to purchase renewable electricity
85 available beginning in 2019 for a term of ten, fifteen, or twenty years
86 under the service agreement approved as part of Schedule 139 and
87 provided as Attachment A to this ordinance.

- 88 20. The service agreement calculates the net cost of Green Direct
89 electricity to be the price of the renewable electricity charge in Schedule
90 139, which consists of an initial fixed rate that will increase two percent
91 annually over the term, less a credit for the cost of conventional electricity,
92 plus ongoing and standard charges for transmission, distribution, billing
93 and other regular services.
- 94 21. According to the Seventh Power Plan issued by the Northwest Power
95 and Conversation Council in February 2016, standard electricity prices are
96 forecast to increase by three percent annually from years 2019 to 2028.
- 97 22. The service agreement requires King County to identify facilities and
98 quantify its anticipated electrical use for enrollment in the Green Direct
99 program, in order to match customer demand with projected electricity
100 supply from the new wind facility.
- 101 23. The service agreement allows King County to exit the Green Direct
102 program before the service agreement term ends, but requires payment of
103 a termination fee. The Green Direct program enrollment form and service
104 agreement transmittal letter from Puget Sound Energy to King County
105 dated November 30, 2016, affirm that Puget Sound Energy will not
106 impose penalties for reduced Green Direct energy consumption due to
107 energy conservation.
- 108 24. King County is seeking the ten-year term option and has identified
109 county facilities currently served with electricity supplied by Puget Sound

110 Energy with a high certainty of operation through the ten-year term of the
111 agreement.

112 25. King County expressed interest in enrollment during the first open
113 season for Green Direct, which closed on November 18, 2016. Execution
114 of a binding service agreement is needed to secure power on a first-come,
115 first-served basis through the Green Direct option beginning in 2019.

116 26. King County will remain a full-service Puget Sound Energy customer,
117 and will continue to partner with Puget Sound Energy on conservation and
118 outreach efforts.

119 27. The actual electrons generated from the wind facility may not directly
120 supply King County operations, but will flow to the electrical grid. King
121 County will receive equivalent renewable electricity under the service
122 agreement.

123 28. Renewable Energy Certificates associated with this wind energy
124 resource will be retired, ensuring that King County's electricity purchase is
125 supporting development of additional renewable energy supply and that
126 associated reductions in greenhouse gas emissions can be counted in King
127 County's greenhouse gas emissions inventory. The retirement of the
128 Renewable Energy Certificates will be verified by the Western Renewable
129 Energy Generation Information System, an independent tracking system.

130 29. Purchasing renewable electricity through Green Direct is projected to
131 reduce direct greenhouse emissions for King County operations by
132 approximately twenty percent.

133 30. Purchasing power through Green Direct advances Strategic Climate
134 Action Plan policy goals and commitments to reduce greenhouse gas
135 emissions from county operations, increase the use of renewable energy,
136 source greenhouse gas neutral electricity, and use county energy
137 investments to catalyze development of our state's clean energy economy.

138 31. The county has evaluated the cost of Green Direct electricity
139 compared to projected costs of conventional electricity over the term of
140 the agreement using three scenarios based on historic average annual price
141 increases for electricity purchased from Puget Sound Energy and one
142 scenario using projected average annual increases in electricity prices in
143 the Seventh Regional Power Plan. Based on this assessment, the county
144 finds that the risk of higher incremental cost over the term of the
145 agreement is minimal and is offset by the benefits of certain pricing for
146 electricity supply and substantial, cost-effective progress in achieving the
147 county's commitments in the Strategic Climate Action Plan.

148 32. The county will continue to work in partnership with utilities, cities
149 and businesses to seek further energy conservation and clean, renewable
150 energy supplies for all Puget Sound Energy customers.

151 33. The term of this agreement, through 2028, extends beyond current
152 budget appropriation authorized by the King County council.

153 BE IT ORDAINED BY THE COUNCIL OF KING COUNTY:

154 SECTION 1. The King County council has determined that the purchase of
155 renewable electricity under the Green Direct program offered by Puget Sound Energy for

156 a ten-year term advances the county's renewable energy and greenhouse gas emission
157 reduction goals adopted as part of King County's 2015 Strategic Climate Action Plan.

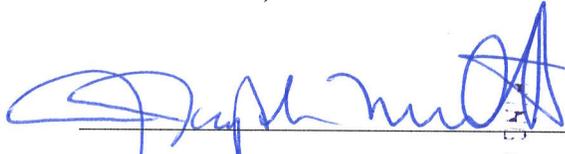

158 SECTION 2. The King County executive is hereby authorized to execute the
159 service agreement for the purchase of renewable electricity with Puget Sound Energy
160 substantially in the form of Attachment A to this ordinance for a term of ten years

161 beginning in 2019 for the list of customer service address and account numbers identified
162 in Attachment B to this ordinance.
163

Ordinance 18472 was introduced on 2/13/2017 and passed by the Metropolitan King County Council on 3/6/2017, by the following vote:

PUGET SOUND ENERGY

**SCHEDULE 139
VOLUNTARY LONG TERM RENEWABLE ENERGY SERVICE AGREEMENT**

Attachment "A" – Service Agreement

THIS SCHEDULE 139 VOLUNTARY LONG TERM RENEWABLE ENERGY SERVICE AGREEMENT ("Service Agreement"), dated as of the _____, is made and entered into by and between **King County** (the "Customer") and PUGET SOUND ENERGY, a Washington Corporation, (the "Company"), for service under the Company's Electric Tariff G Schedule 139. Terms defined in Schedule 139 and in the General Rules and Provisions (Schedule 80) of the Company's tariff for electric service shall have the same meanings where used in this Agreement.

RECITALS

- A. The Company is a public service company engaged in the sale and delivery of electric energy pursuant to its Electric Tariff G.
- B. Customer is receiving Electric Service under the Company's Electric Tariff G, Schedule 24, 25, 26, 31, 40, 43, 46 or 49, and desires to participate in the Company's Voluntary Long Term Renewable Energy program offered under Schedule 139.
- C. The Company and the Customer have worked jointly to encourage the development of Renewable Energy projects that (i) could provide clean energy to customers at a long-term contracted rate, (ii) support the local economy, and (iii) could be publicized and leveraged for external benefit. The Parties agree that the Wind – 10 Year (the "Resource Option") should meet these criteria, and the Parties thus now agree to enter into this Service Agreement with each other, for mutual benefit.
- D. The Company will sell and the Customer will purchase from the Company Renewable Energy Credits (RECs), where applicable, and Renewable Energy at a contracted volume equal to 100% of the load of all meters located at each subscribed service address (the sum of Anticipated Average Annual Loads) as listed in Section 5, with such amount to be allocated from Renewable Energy generated by the Resource Option, pursuant to one of the contracted rates described.

AGREEMENT

- 1. **Request and Acknowledgement.** The Customer requests service under Schedule 139 and acknowledges that Schedule 139 requires a minimum term. Service under Schedule 139 will be billed on the Customer's existing statement. The Resource Option Energy Charge is fixed as shown in Section 7. The Energy Charge Credit will be updated with each general rate case, power cost only rate case or other power-related filings.
- 2. **Resource.** Under this Service Agreement the Company will receive Renewable Energy into its Balancing Authority Area from where it can serve the Customer.
- 3. **Renewable Energy Credits.** The Company will acquire the RECs that are created with the electricity production, where applicable. The Company will transfer the RECs to the Customer

PUGET SOUND ENERGY

which must be retired in WREGIS. Alternatively, at the Customer's request, the Company will retire the RECs in WREGIS. As the Customer is receiving a retail product, the RECs may not be resold or transferred to another party.

4. **Resource Option.**
Number: 13901W10
Description: Large wind project in Thurston and Lewis Counties, Washington
5. **Customer Service Address and Account Numbers.** The Customer requests service under this Service Agreement for the service addresses, account numbers and meter numbers listed in Attachment B. The aggregated Anticipated Average Annual Load is included in Attachment B.
6. **Term.** The term of this Service Agreement shall commence in the year **2019**, on the first day of the Customer's normal billing cycle, in the first month following the commencement of commercial operation of the Resource Option, and delivery therefrom of energy to the Company sufficient to satisfy the obligations set forth in this Service Agreement. This Service Agreement terminates in the year **2028** after 12 billing cycles.
7. **Rates.** Schedule 139 rates are in addition to all charges under the Customer's existing Electric Service schedule. Rates include a charge per kWh for the contracted energy as outlined in Table 1 and a credit for the energy-related power cost component of the Energy Charge set forth in Schedule 24, 25, 26, 31, 40, 43, 46 or 49 of the Electric Tariff WN U-60 under which the Customer is taking Electric Service. The Energy Charge Credit will be updated with each general rate case, power cost only rate case, or other power-related filings, while the Resource Option Energy Charge will remain fixed as outlined in the Table 1. below.

Table 1

Calendar Year	2019	2020	2021	2022	2023	2024	2025
Rate per kWh	\$0.05111	\$0.05213	\$0.05318	\$0.05424	\$0.05532	\$0.05643	\$0.05756
Calendar Year	2026	2027	2028	2029	2030	2031	2032
Rate per kWh	\$0.05871	\$0.05989	\$0.06108	NA	NA	NA	NA
Calendar Year	2033	2034	2035	2036	2037	2038	
Rate per kWh	NA	NA	NA	NA	NA	NA	

8. **Early Exit Fee.** Customers may elect to terminate this Service Agreement prior to the Termination Date with 60 days' notice to the Company. Customers who choose to discontinue their service under this Schedule will be charged for the net cost of the remaining Renewable Energy that was to be delivered to the Customer under the remaining term of the Service Agreement. This amount will be based on: 1) the remaining term of the Service Agreement, 2) the amount of annual Renewable Energy needs ("full requirements") of each of the discontinued Customer' locations as listed in Section 5 of the Service Agreement, 3) the contracted energy rates agreed to in Section 7 of the Service Agreement, and 4) a credit for PSE's then-current

PUGET SOUND ENERGY

avoided costs (filed consistent with WAC 480-107-055). Termination of service under this Schedule will follow receipt and processing of the termination request by the Company.

- 9. **Resource Option Inadequacy.** If the Resource Option will not be available at the start of the commencement year, the Customer's agreement will be delayed to align with the Resource Option. If the Renewable Energy produced by the Resource Option and purchased by the Company is insufficient in any calendar year to satisfy the full requirements of the Customer, the Company will work with the Customer to source and retire for the Customer RECs from alternative resources, with costs for the RECs limited to the net amount to be collected under Schedule 139 from the Customer for the remainder of the calendar year. If, at the Company's determination, the Resource Option will not be adequate to meet the full requirements of the Customer, then this Service Agreement will be terminated with no liability to the Customer or to the Company. If a replacement project can be sourced and mutually agreed upon, a new Service Agreement will be created.
- 10. **Credit.** Customer authorizes that the Company may run a credit report on Customer and/or request audited financial statements for the purpose of determining the Customer's creditworthiness for this service.
- 11. **Energy Efficiency Services.** The Customer and the Company will continue to partner on mutually beneficial energy efficiency projects which will reduce energy demand on an annual basis. These services will have no bearing on the cost of energy as proposed in Table 1.
- 12. **Electrical Work.** In order to ensure continued qualification for service under Schedule 139, the Customer must contact the Company through their business account services representative when any electrical work is being conducted.
- 13. **Governing Law.** This Service Agreement will be governed by and interpreted, construed and enforced in accordance with the laws of the State of Washington.

IN WITNESS WHEREOF, the Parties, by their duly authorized representatives, have executed this Agreement as of the date first written above.
