

An Updated Pandemic Influenza Response Plan

Proposed Motion 2004-0008

Joy Carpine-Cazzanti, Government Relations, Public Health – Seattle & King County
Brendan McCluskey, Director, King County Office of Emergency Management
Nick Solari, Preparedness Director, Public Health – Seattle & King County
Dr. Eric Chow, Interim Health Officer, Public Health – Seattle & King County

Health, Housing and Human Services Committee Meeting

February 4, 2025

Lessons Learned from COVID-19

- King County's history of emergency planning helped us manage the COVID-19 pandemic.
- Prior pandemic plans developed by Public Health – Seattle & King County informed our initial response to COVID-19.
- Public Health published a [2022 After Action Report](#) documenting our collective experiences in responding to the height of the pandemic.

Biological Incident Response Annex

- Guides responses to influenza, coronaviruses, other infectious diseases, and bioterrorism events.
- Addresses pandemic response phases identified by CDC, authorities and responsibilities of governmental and non-governmental agencies, and lessons learned from previous incident responses.
- Documents initial coordination processes, response strategies, and critical resources for operations.

EMERGENCY SUPPORT FUNCTION (ESF) #8 ANNEX
VERSION 1.0
DECEMBER 2023

Motion 15650: Updated 'Pandemic Influenza Response Plan' Report
Page 1 | Appendix B, Biological Incident Response Annex

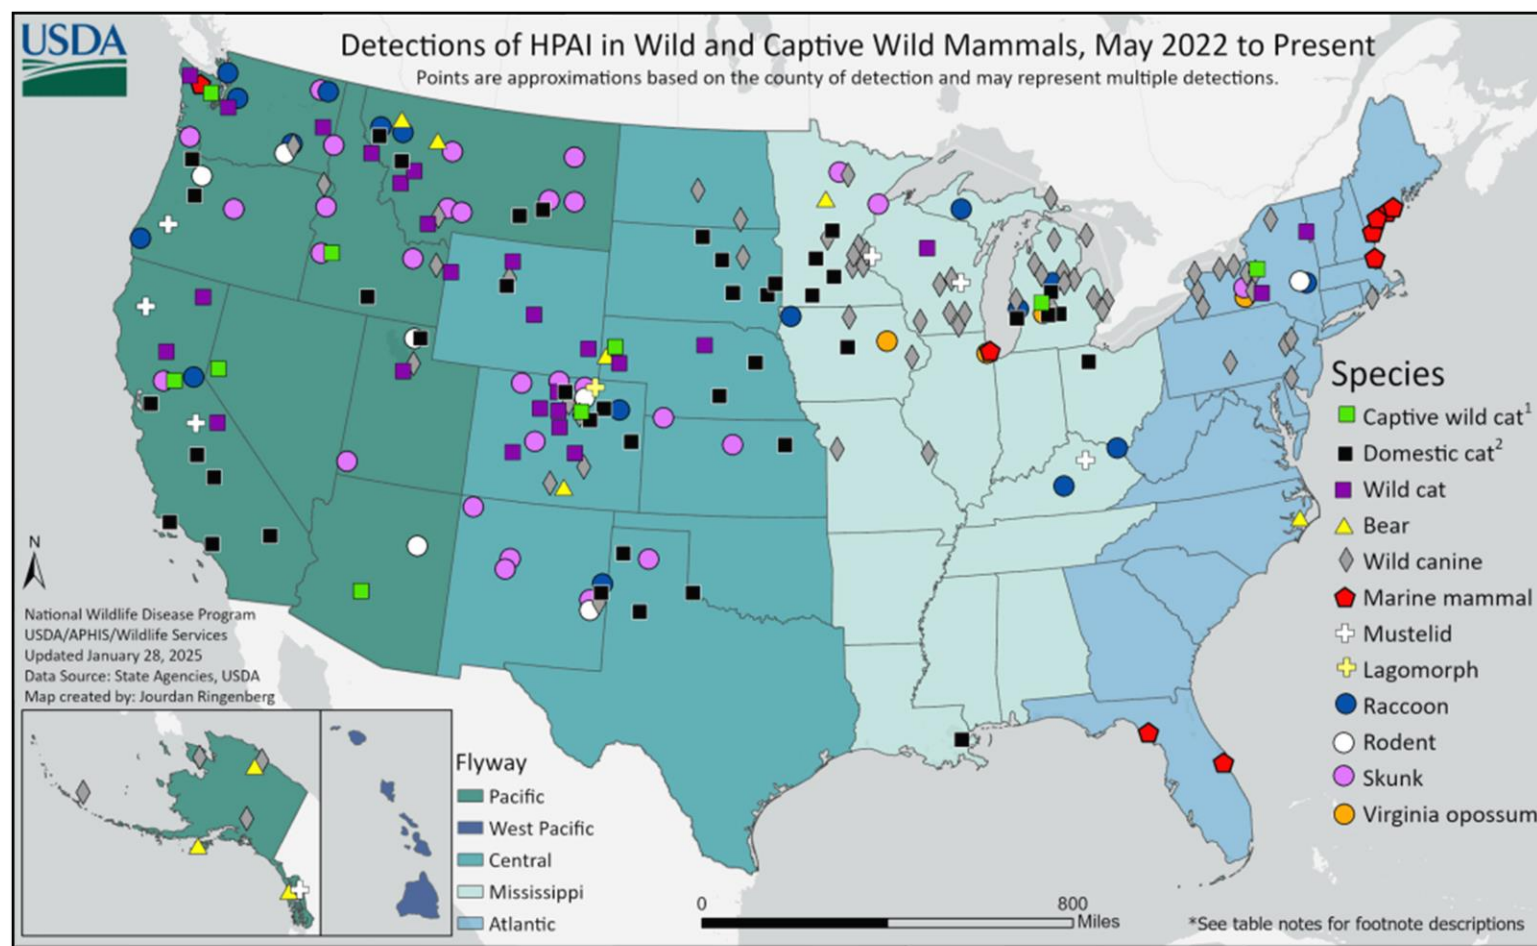

Putting plans into action

- Epidemiology, Surveillance, and Data
- Health Guidance and Public Information
- Information Sharing
- Medical Countermeasures (Vaccination, Medications)
- Non-pharmaceutical Interventions (Infection Control, Personal Protective Equipment, Isolation & Quarantine)
- Responder Safety and Wellbeing
- Testing

Potential Future Biological Threats

- Highly Pathogenic Avian Influenza (HPAI) or H5 Flu
- Clade 1 Mpox
- Viral Hemorrhagic Fevers

Preparing our workforce and infrastructure

- **GOAL:** *Public Health can provide necessary services, resources, and information to promote the health of the most impacted communities during emergencies.*
- Taking action to ensure employees are trained and our everyday systems can flex and surge to meet the demands of future emergencies.
