A MOTION accepting the Lakemont Boulevard Southeast Extension Final Environmental Impact Statement and the executive's recommendations on extending Lakemont Boulevard Southeast.

WHEREAS, the county has desired to make necessary improvements for a principal arterial, to serve existing and anticipated transportation needs on the north side of Cougar Mountain, and to provide improved access to Interstate 90 (I-90) for this area, and

WHEREAS, the executive has completed and issued the FEIS for the Lakemont Boulevard Extension, and

WHEREAS, the executive in transmitting the FEIS has recommended the extension of Lakemont Boulevard Southeast from its current terminus, approximately 2,500 feet north of 164th Avenue South, through Lewis Canyon, to the West Lake Sammamish Parkway Southeast Interchange with I-90 and further recommended the three travel lanes with bicycle lanes option, and

WHEREAS, concerns about the impact of the project upon Lake Sammamish water quality have been expressed during the council review and public meetings and discussions of the project FEIS, and the response has been that more specific information on the surface water, drainage and water quality will be available during the preliminary engineering and design of the proposed Lakemont project, and

WHEREAS, King County is the lead member of a cooperative interjurisdictional project team including Metro, Bellevue, Redmond and Issaquah, which was established to work cooperatively to protect Lake Sammamish, and will be working together to reduce phosphorus and protect Lake Sammamish water quality.

NOW, THEREFORE, BE IT MOVED by the Council of King County:

A. The Lakemont Boulevard Southeast Extension Final Environmental Impact Statement and the executive's recommendations and support of the construction of the Lakemont Boulevard Extension through Lewis Canyon with the three travel lanes, and two additional 5' bicycle lanes are hereby adopted.

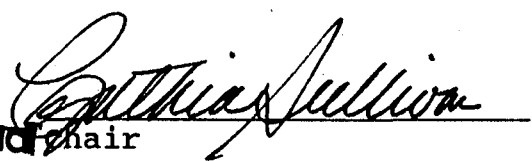

1 B. The executive is requested to develop any required  
2 appropriation ordinances and to request authorization to enter  
3 into further cost sharing agreements with the city of Bellevue,  
4 State of Washington and other agencies for the construction of  
5 the Lakemont Boulevard Southeast Extension.

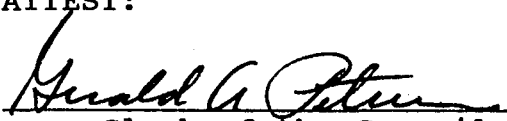

6 C. Due to the sensitivity of Lake Sammamish to  
7 pollutants, such as sediments, fertilizers and phosphates, the  
8 proposed extension of Lakemont Boulevard Southeast will require  
9 special water quality and surface water management  
10 considerations. The council requests that the executive  
11 include in the project plan of work an element that assigns to  
12 the Lake Sammamish Interjurisdictional Team the role to oversee  
13 and monitor the special water quality design considerations.  
14 These should include: a complete analysis of plans and future  
15 permit applications, preliminary road design, engineering,  
16 construction, maintenance, monitoring, and modifications, if  
17 needed, after implementation and construction of water quality  
18 programs and facilities, to assure the best management  
19 practices are available for the protection of Lake Sammamish  
20 water quality.

21 D. Reimbursement to King County Surface Water Management  
22 Division for providing the oversight of the design,  
23 construction and post construction monitoring shall be included  
24 in the appropriation ordinance and within the cost sharing  
25 agreement with the city of Bellevue, State of Washington and  
26 other agencies for the construction of the Lakemont Boulevard  
27 Southeast Extension.

28 PASSED this 19<sup>th</sup> day of July, 1993.

29 KING COUNTY COUNCIL  
30 KING COUNTY, WASHINGTON

31
