Signature Report

May 2, 2016

Motion 14634

Proposed No. 2016-0227.1

Sponsors Dembowski and Dunn

1 A MOTION approving the ballot drop-off location plan
2 prepared by the department of elections as required in the
3 2015/2016 Biennial Budget Ordinance, Ordinance 17941,
4 Section 34, Proviso P4, as amended by Ordinance 18239,
5 Section 16.

6 WHEREAS, Ordinance 17941, Section 34, Proviso P4, as amended by Ordinance
7 18239, Section 16, states that \$351,000, solely for the one-time provision of new ballot
8 drop boxes, shall [not] be expended or encumbered to install ballot drop boxes until the
9 director of elections transmits by April 30, 2016, the plan requested by Motion 14491 and
10 a motion that approves the plan and the motion is passed by the council, and

11 WHEREAS, the King County council passed Motion 14491, which reflected an
12 important commitment to expanding access to and the convenience of voting in King
13 County, and

14 WHEREAS, Motion 14491 requests that the director of elections transmit a plan
15 that includes: (1) a proposed number of additional drop-off locations to ensure
16 geographic equity; (2) proposed sites for the drop-off locations; (3) estimated costs; and
17 (4) an implementation timeline, and

18 WHEREAS, Motion 14491 also requires that the plan include an analysis of the
19 feasibility and desirability of using all public library locations in King County, including

20 Seattle Public Libraries and the King County Library System, as a means to ensure
21 geographic equity and convenience for voters, and

22 WHEREAS, the director of elections has transmitted to the council a plan that
23 contains the required information responding to the proviso, and

24 WHEREAS, the council has reviewed the plan;

25 NOW, THEREFORE, BE IT MOVED by the Council of King County:

26 The council hereby approves the ballot drop-off location plan, which is
27 Attachment A to this motion, prepared by the department of elections as required in the

28 2015/2016 Biennial Budget Ordinance, Ordinance 17941, Section 34, Proviso P4, as
29 amended by Ordinance 18239, Section 16.
30

Motion 14634 was introduced on 4/18/2016 and passed by the Metropolitan King County Council on 5/2/2016, by the following vote:

Yes: 9 - Mr. von Reichbauer, Mr. Gossett, Ms. Lambert, Mr. Dunn,
Mr. McDermott, Mr. Dembowski, Mr. Upthegrove, Ms. Kohl-Welles
and Ms. Balducci

No: 0

Excused: 0

Executive Summary

Removing Barriers to Access

The most important priority for King County Elections (KCE) is removing barriers to the voting process and ensuring that every eligible voter is able to easily and conveniently exercise their right to vote. To advance this priority, KCE has undertaken strategies like advocating for later voter registration deadlines in Olympia, expanding opportunities for voters to access their ballot online, providing election materials in the voter's preferred language and operating ballot drop-off locations to give voters an extra option for returning their ballot without the cost of postage.

Ballot drop boxes have become an important tool for King County voters to participate in an election. At present, King County Elections operates ten permanent ballot drop boxes and twelve temporary vans that provide ballot drop-off opportunities. The number of ballot drop boxes in King County has varied over the last seven years but it is clear that voters have come to rely on this service; in recent elections, approximately 22 percent of all ballots were returned via a ballot drop box.

With the passage of Motion 14491 and subsequent supplemental funding, the King County Council firmly supported expanding the number of ballot drop boxes and more importantly, expanding access and convenience for King County voters. In order to ensure a thorough and intentional process for selecting new drop-off locations, the legislation requested KCE to provide a plan, focusing on the feasibility of using libraries as potential sites, to the County Council by April 30, 2016.

Criteria and Evaluation Process

To study the potential for new ballot drop-off locations, Elections staff made visits to more than 100 sites around King County to assess in-person, the feasibility and desirability of each site. In order to evaluate potential ballot drop box sites in a robust, transparent and comprehensive way, KCE developed a set of criteria against which each location was scored. These criteria included:

- Alignment with Department and County Goals
- Operational Effectiveness
- General Accessibility
- Continuity of Service

Plan Summary, Feasible Locations and Timeline

The plan to improve voter access through increased ballot drop-off locations includes a recommendation to discontinue the use of ballot drop-off vans while adding additional permanent, 24-hour ballot drop boxes to maximize voter convenience. The proposal for additional drop boxes calls for a phased approach in 2016 and lays out options for future locations in 2017. In short, the plan calls for no changes to the ten current ballot drop-off locations (to promote continuity) but makes recommendations for adding nineteen additional boxes in phase one and another 14 boxes in phase two - for a total of forty-three boxes in operation in time for the General Election. Highlights of the plan for increasing voter access through additional ballot drop boxes include:

- Of the forty-three locations deemed feasible for 2016, twenty-four of them are located at public libraries.
- Six locations are located in unincorporated King County.
- Geographically isolated communities of Vashon Island, Southeast King County and East King County are proposed for inclusion.
- Culturally distinct communities in the International District of Seattle and the Muckleshoot Reservation are proposed for inclusion.
- Twenty-six proposed locations are in areas that score highest in key equity demographic characteristics (see Appendix).
- The vast majority of King County residents (91.5% of residents) live within 3 miles of a proposed location (see Appendix).

Major milestones for the recommended proposal:

- April 14: KCE submits Ballot Drop-off Location plan to Council
- April 14 – May 14: Council review and consideration of plan
- June: Proposed phase I drop boxes installed
- July 14: Primary election voting begins (29 ballot drop boxes open)
- September: Proposed phase II drop boxes installed
- October 20: General Election voting begins (43 drop boxes open)

Next Steps

The plan proposes specific locations based on the evaluation process and is contingent on agreements with property owners and Council approval. The plan calls for the use of 24 public library-based locations. KCE has proposed submitting an addendum to this report by July 1, 2016 with a final list of proposed Phase II locations once site agreements are in place.

Introduction

Original Ballot Drop Box Legislation

On June 19, 2006 the King County Council enacted Ordinance 15523, which moved the County to a vote-by-mail system of elections. The ordinance also directed the Executive to provide a report on the proposed cost, locations and security measures required to operate regional voting centers and ballot drop boxes.

The Executive formed an advisory committee and ultimately issued a report that was approved in 2008 by Motion 12820. In the report the committee recommended 36 ballot drop-off locations, all of which were either King County Library System locations or City of Seattle Neighborhood Service Centers.

Drop Box Program, 2008 – Present

Starting in 2008, and pursuant to the approved plan, King County Elections piloted eight ballot drop boxes for the Primary and General Elections in order to begin the transition to vote-by-mail. However, as a result of service cuts made in the 2010 budget process, the number of ballot drop boxes was reduced to just two - the minimum requirement under Washington Administrative Code 434-250-320. At that time, community stakeholders expressed concern over this minimal number of drop boxes. In response, twelve ballot drop boxes were restored in time for the General Election in 2010.

In order to meet the increased voter demand during the Presidential Election in 2012, KCE piloted temporary ballot drop-off vans for the first time. The temporary van locations were successful and in 2013 nine additional vans were added. Today, King County Elections operates ten permanent ballot drop-off locations and operates twelve vans during each Countywide election. The ten current locations are listed below.

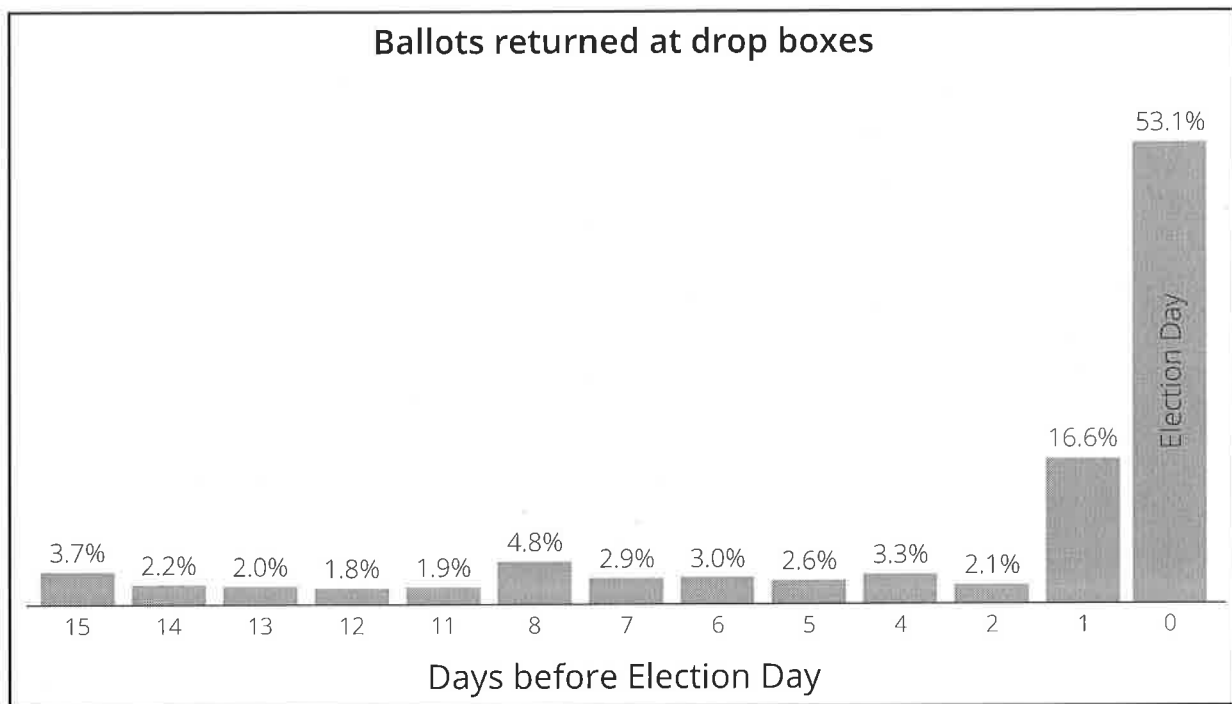

- Ballard Library
- Burien City Hall
- Crossroads Shopping Center
- Federal Way City Hall
- Issaquah City Hall
- King County Administration Building
- King County Elections Building
- Lake Forest Park City Hall
- Redmond City Hall
- Regional Justice Center

During each election, the location of every ballot drop box is advertised on King County Elections' website, a list is included as an insert with the ballot packet mailed to each voter and a list is published in the Local Voters' Pamphlet mailed to each King County household.

Ballot Drop Off Locations: A Plan to Increase Access and Convenience

In a vote-by-mail environment, the United States Postal Service is a key partner in delivering ballots to voters. However, USPS requirements may limit voter options and convenience when it comes to returning a ballot. There can be confusion about postmarks, pick-up deadlines, post office locations and postage requirements. Also, some voters have reported mistrust about returning their ballot through the postal system.

Consequently, ballot drop boxes have become a useful option for many King County voters. During the last four general elections, for example, 22% of ballots were returned via drop box. The usefulness of drop boxes is especially evidenced by their popularity in the last days of the voting period. Approximately 70% of all ballots returned to a drop box are deposited on Election Day or the day before. (See chart below)

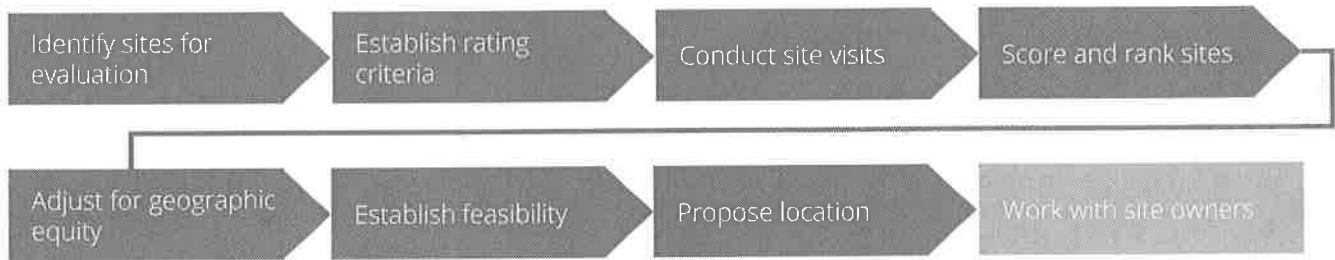

It is a priority for the Department of Elections to improve access to and the convenience of voting. Adding additional ballot drop-off locations will improve access and make voting more convenient to more voters in King County. To that end, Elections has undertaken a project to evaluate sites around King County and measure the feasibility of each one to serve as a new ballot drop-off location. The remainder of this document reports on the results of our evaluation and includes a list of proposed new sites to be installed in 2016.

Site Feasibility Analysis

Evaluation Methodology

The graphic below illustrates the process Elections went through in order to reach the proposed list of locations.

Identifying Potential Sites

In order to establish the relative feasibility of potential ballot drop-off locations Elections began by identifying sites for evaluation. Sites were pulled from various sources including:

- Motion 14491 which requested the consideration of public libraries
- The list of current sites
- Suggestions from local jurisdictions and community partners
- Suggestions from the voting public
- Suggestions from the King County Council and the Executive's Office

Based on these sources, our office compiled a list of over 100 locations to evaluate.

Criteria Development

In order to evaluate the feasibility of potential sites, many factors were taken into consideration. A set of specific criteria was developed to measure and score each potential location. We developed this set of criteria with input from key stakeholders such as: the Citizen's Election Oversight Committee (CEOC), the King County Office of Equity and Social Justice (ESJ), King County Council members and staff, the Seattle Public Library and King County Library System and residents representing Limited English Speaking communities.

A short description of the factors and criteria follows:

One factor we considered was how closely a potential site could advance or ***align with an existing County and Department goal***. With assistance from the County's ESJ Office, we assessed the impact of drop box placement in communities that have been traditionally under-served or underrepresented. We also analyzed election data in order to identify areas with lower voter participation levels.

Another general factor we considered was ***Operational Effectiveness***. We established a set of specific criteria based on election administration requirements around picking up ballots and closing drop boxes on Election Day, along with other logistical, safety and security needs.

A third factor was centered on criteria around **Accessibility**; taking into account issues such as access and proximity to public transit, location visibility and traditional accessibility considerations.

The last factor was **Continuity of Service**; we rated sites based on their history of service as a ballot drop-off location to promote continuity and avoid reductions of established service to communities where ballot drop off locations are already located.

Visiting and Scoring Sites

Between February 22 and March 31 of this year Elections staff conducted site visits to over 100 locations around King County. Staff documented existing conditions, noting any potential challenges or opportunities at each sites. Once site visits were complete, each location was rated on thirteen different criteria and a cumulative score was derived for each location.

Description of Criteria and Scoring

Alignment with Department and County Goals

Criteria	Score	Description
Serving isolated communities Does the location reside in a geographically isolated area or serve a culturally distinct community? Example: unincorporated KC, tribal communities, Vashon Island, SE King County, etc.)	10	The site is designated as isolated or located in unincorporated King County.
	0	The site is not designated as isolated or in an incorporated city or town.
Providing equitable services Does the location reside in a community with demographic characteristics that warrant equity considerations? Using an established ESJ metric to score an area's combination of diversity, household income, and English proficiency. Scores are grouped into quintiles.	10	Highest quintile score.
	7	Second highest quintile.
	3	Third highest quintile.
	0	Fourth highest quintile.
	0	Lowest quintile score.
Disparities in voter participation Is the site located in an area that has lower than average voter registration rates?	8	Adjacent to census tract with lower than average voter registration rates.
	4	Lower than average voter registration rates.
	0	Average or higher than average voter registration rates.
Responsible growth Proximity to Puget Sound Regional Council designated regional centers	2	Within a designated "regional center".
	0	Outside a designated "regional center".

Operational Effectiveness

Criteria	Score	Description
Ballot pick-up/box closing Does the site support an effective, safe and secure ballot pick-up and box closing process for KCE? Examples: stairs or inclines on the path(s) to/from box, potential to place a box in close proximity to parking, etc.	10	Site conditions present no challenges to the daily ballot pick-up or box closing process.
	5	Site conditions may present a challenge to the daily ballot pick-up or closing process but can be mitigated.
	0	Site conditions do not support an effective daily ballot pick-up or box closing process.
Site owner input Are there site owner concerns regarding increased traffic flow that would negatively affect existing site tenant(s)? Are there known or planned construction projects on site (or near) that might impact the accessibility or feasibility of the site?	5	There are no site owner concerns.
	2.5	There are site owner concerns that can be mitigated by KCE.
	0	Site owner concerns or site conditions do not support an effective ballot drop-off location.
Drive-up option Do site conditions support both walk-up and drive-up ballot deposit options for voters? Drive-up options offer more convenience to voters.	5.5	Site conditions, as they presently exist, can support a drive-up option.
	2.5	Site conditions could support a drive-up option but doing so might impact host property.
	0	Site conditions do not support a drive-up option.
End-of-Line Does the site support effective control of traffic (both vehicular and pedestrian) to establish "on-time" and "end-of line" status at the voting deadline? Examples: size of the usable area adjacent to the box (to establish orderly queuing), the ability to limit the number of clear paths to the box.	5	Site conditions present no challenges to establishing end-of-line status.
	2.5	Site conditions present some challenges to establishing end-of-line status.
	0	Site conditions do not support an effective end-of-line establishment process.

Accessibility

Criteria	Score	Description
Visibility Does the site allow for placement of a box that is readily visible and easy to locate by voters? Conditions include: lighting, a clear line of sight from street and/or parking	5	Voters can easily locate the box on site; is fully visible from multiple directions.
	2.5	Some voters may be challenged to find the box without extra signage or lighting.
	0	There may be challenges in finding the box on site due to placement or visibility.
Access to Public Transit Can voters visit the location via public transit? Conditions evaluated include: the number of modes of public transit available at the site and distance from public transit stops/stations.	5	Served by multiple bus lines or modes of public transit; transit stops within 1000 ft.
	2.5	Served by one bus line or mode of public transit or stop/station is >1000 ft away.
	0	The site is not served by public transit.
Parking Does the site possess adequate parking for voters? Example: number of parking spots, dedicated parking vs shared parking spots, distance from parking to box and off-street parking in dense locations.	5.5	Adequate parking option.
	2.5	One or more challenge(s) to parking (< 20 parking spots, limited load/unload options, distance to box exceeds 100ft).
	0	Inadequate parking (pay parking, no load/unload, distance to box exceeds 200ft).
ADA factors Does the site possess all accessible features possible? Conditions evaluated include: parking lot slope, turning radius adjacent to box placement, curb cuts, number of ADA parking spots, unimpeded path to box from ADA parking	5	Site conditions support 100% accessibility.
	2.5	Adequate with some mitigation.
	0	Site does not support accessibility.

Continuity of Service

Criteria	Score	Description
Location History Does the site have a history of serving as a ballot drop-off location?	20	The site currently serves as an existing ballot drop box.
	10	Site is a current van location or would serve as a permanent replacement for a current van location.
	0	All other sites.

Ranking Sites

The following table is a list of each location that was evaluated and its final score according to our criteria, sorted by King County Council district. The list also documents each location's feasibility (either a simple yes or no) and includes corresponding notes, if applicable. Notes are generally a short explanation of why a site may have been scored highly but not proposed as a potential new location.

Location Name	KCCD	Score	Feasible?	Notes
Lake City Library	1	73	Y

Adjusting for Geographic Equity and Establishing Feasibility

Based on scores in the preceding table there are many sites that are desirable as potential ballot drop-off locations. However, to achieve a comprehensive and practical list of locations, other considerations were factored in: namely, geographic equity and site owner input. Our plan to increase voter access includes a combination of feasible locations that are geographically dispersed and have a high likelihood of working for site owners. A summary of our proposed plan is below:

1 10 current drop box locations – our plan proposes no changes to current locations*

- Ballard Library
- Burien City Hall
- Crossroads Shopping Center
- Federal Way City Hall
- Issaquah City Hall
- King County Administration Building
- King County Elections Building
- Lake Forest Park City Hall
- Redmond City Hall
- Regional Justice Center

2 12 locations rated as desirable and feasible; we propose installing boxes at these sites before the Primary (these locations are intended to replace old van locations)

- Auburn Library
- High Point Library
- Kirkland City Hall
- Lake City Library
- NewHolly Library
- Sammamish City Hall
- Shoreline Library
- Tahoma School District Building
- University of Washington
- Valley View Library
- White Center Library
- Woodinville Library

3 7 additional locations rated as desirable and feasible; we propose installation before the Primary

- Algona-Pacific Library
- Bellevue Regional Library
- Broadview Library
- Enumclaw Library
- Fairwood Library
- Green Lake Library
- Skyway Library

4

14 additional locations rated as feasible or desirable; we propose installation of the 8 feasible and further exploration of the 6 desirable in time for the General Election

- Beacon Hill Library
- Bothell Regional Library
- Capitol Hill (TBD)
- Chinatown/International District (TBD)
- Covington Library
- Highline College (TBD)
- Kent East Hill (TBD)
- Kingsgate Library
- Muckleshoot Library
- Rainier Community Center (TBD)
- Renton Highlands (TBD)
- Snoqualmie Library
- South Park Library
- Vashon Library

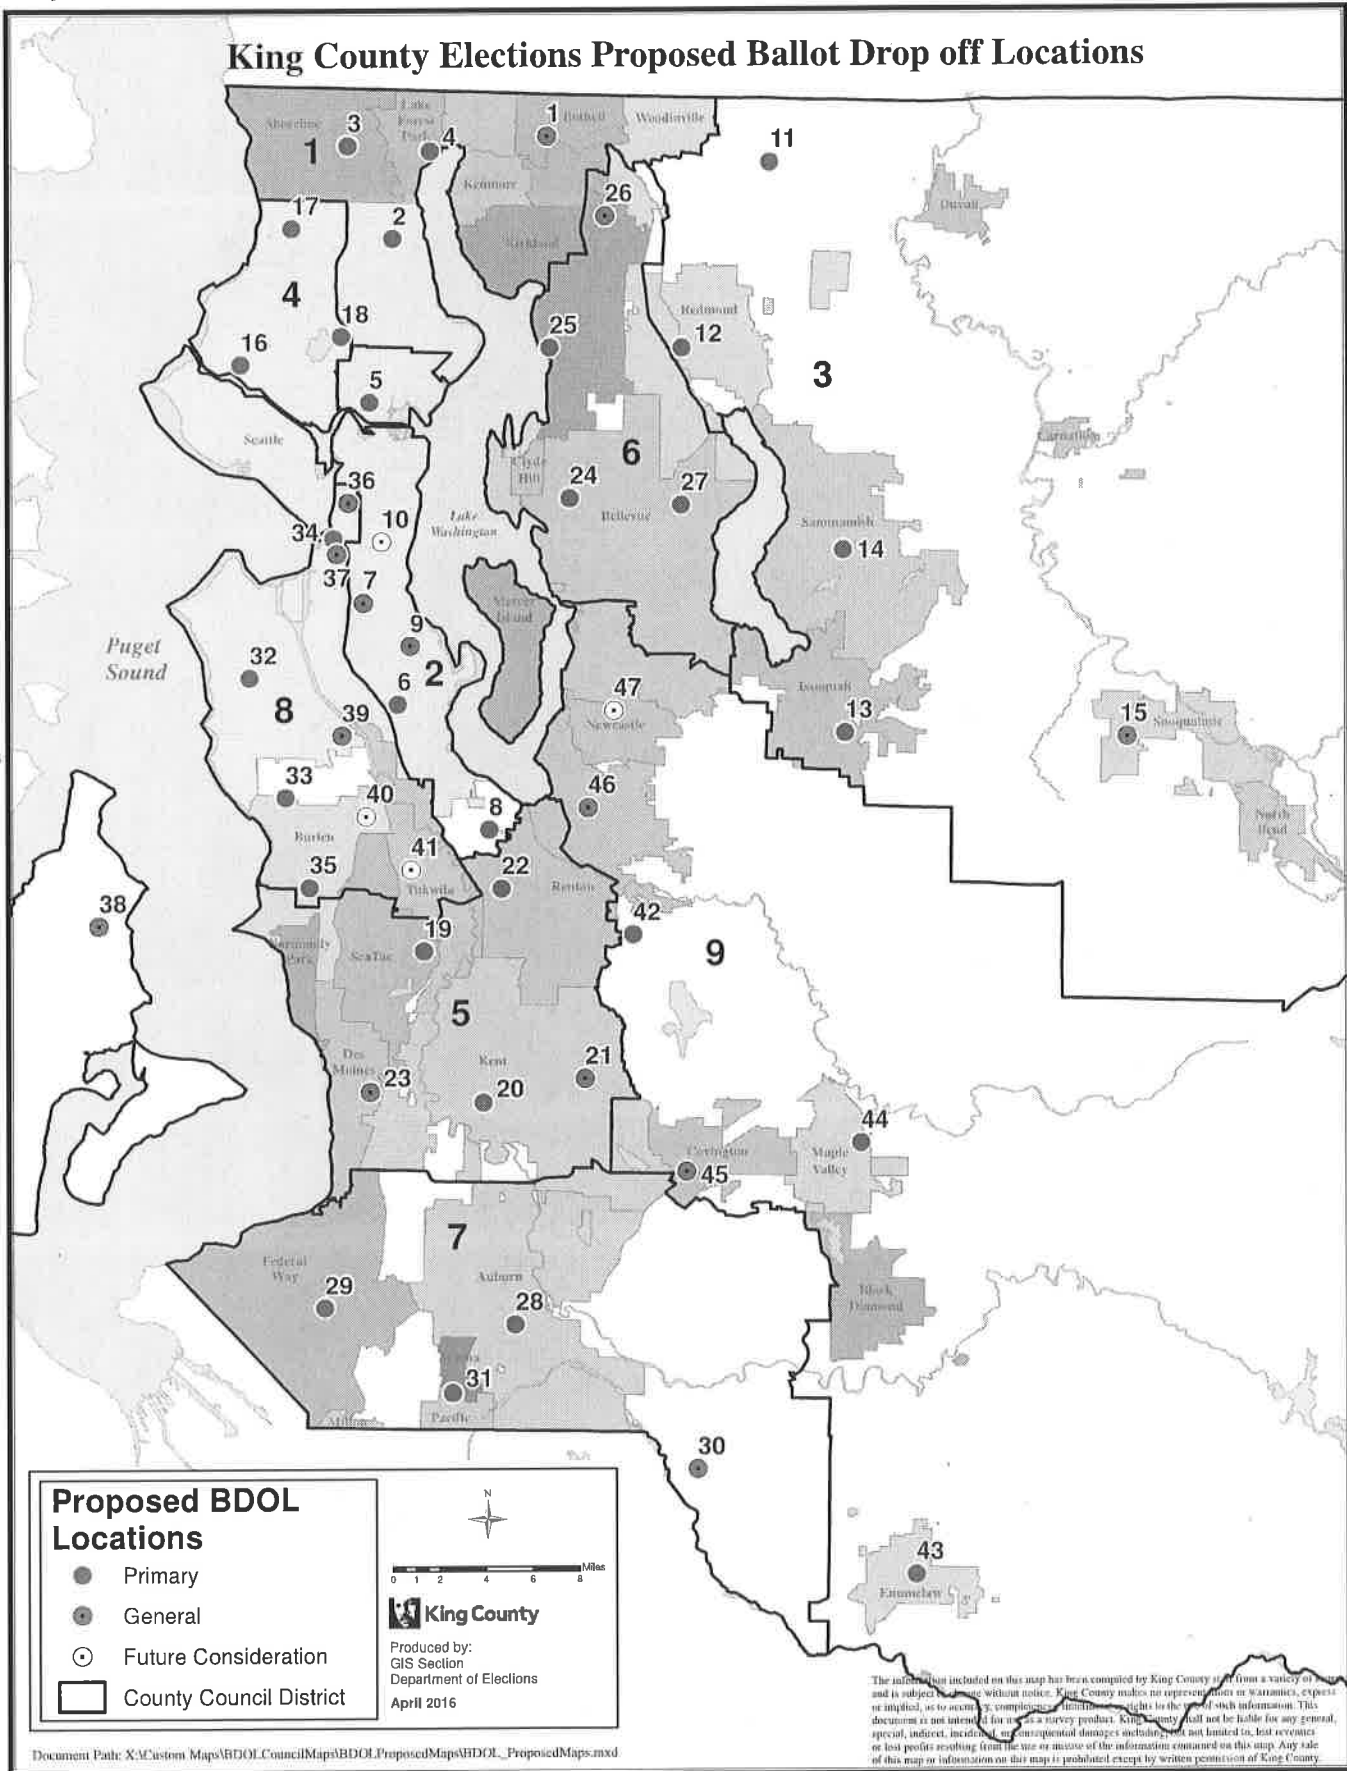

5

4 other locations rated as feasible but not available in 2016. We propose re-evaluation in 2017

- Boulevard Park Library
- Douglas Truth Library
- Foster Library
- Newcastle Library

** The current boxes used at our ballot drop-off locations all have differing levels of wear and tear. We will assess the condition of each drop box and replace the boxes that are in need of physical replacement. We anticipate extending the useful life of the several existing boxes that are shielded from weather and can still function without any operational concerns.*

Proposed Locations

Legend of proposed locations

1. Bothell Regional Library
2. Lake City Library
3. Shoreline Library
4. Lake Forest Park City Hall
5. University of Washington
6. NewHolly Library
7. Beacon Hill Library
8. Skyway Library
9. Rainier Community Center
10. Douglas Truth Library
11. Woodinville Library
12. Redmond City Hall
13. Issaquah City Hall
14. Sammamish City Hall
15. Snoqualmie Library
16. Ballard Library
17. Broadview Library
18. Green Lake Library
19. Valley View Library
20. RJC-Kent
21. Kent East Hill (TBD)
22. Election Headquarters
23. Highline College (TBD)

32. High Point Library
33. White Center Library
34. KC Administration Building
35. Burien Library/Burien City Hall
36. Capitol Hill (TBD)
37. International District (TBD)
38. Vashon Library
39. South Park Library
40. Boulevard Park Library
41. Foster Library
42. Fairwood Library
43. Enumclaw Library
44. Tahoma School District Bldg.
45. Covington Library
46. Renton Highlands (TBD)
47. Newcastle Library

Summary of Feasible Locations

The specific combination of feasible locations in the current plan balance geographic dispersion, convenience and equity. Highlights of the plan for increasing voter access through additional ballot drop boxes include:

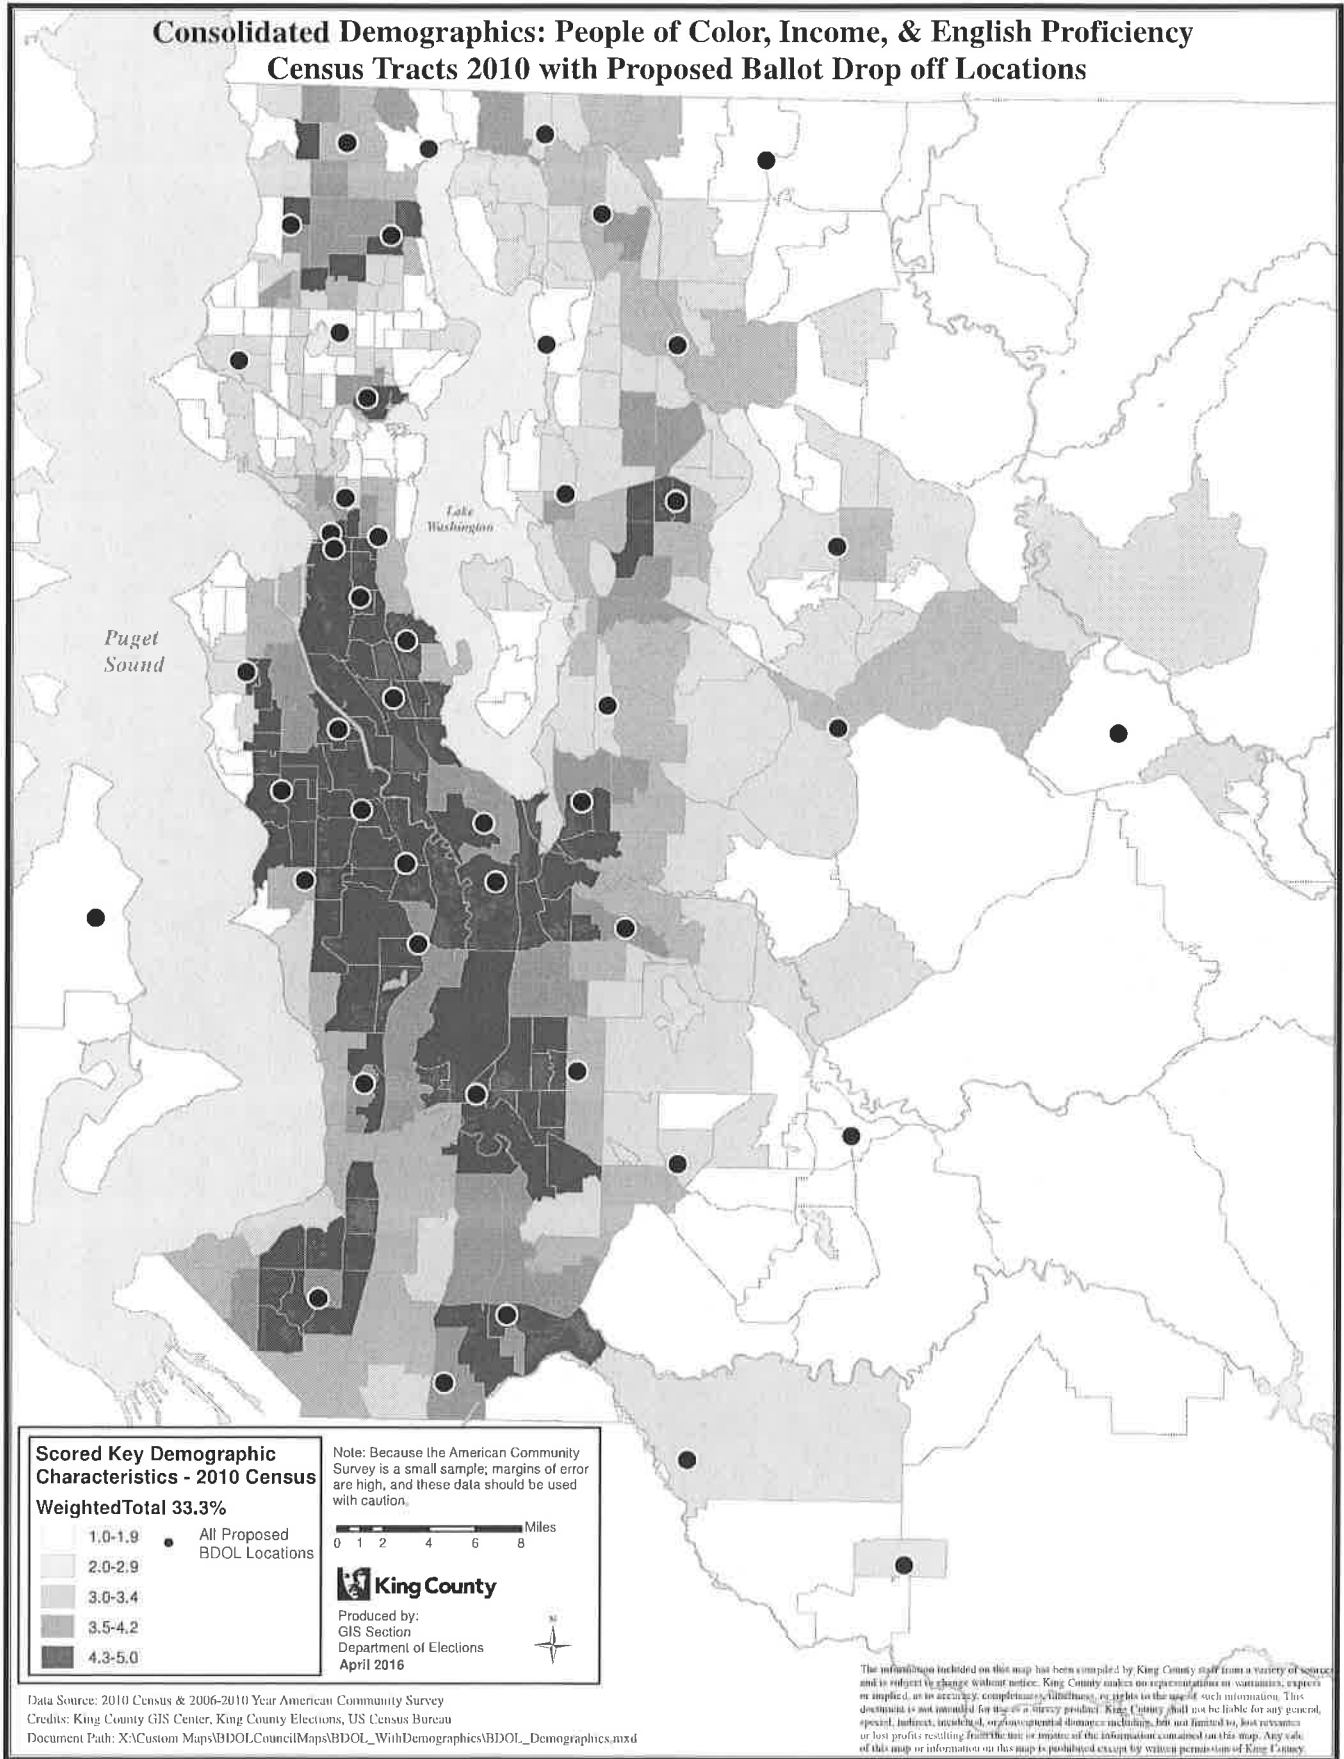

- Of the forty-three locations deemed feasible for 2016, twenty-four of them are located at public libraries
- Six locations are located in unincorporated King County
- Geographically isolated communities on Vashon Island, SE King County and East King County are proposed for inclusion
- Culturally isolated communities in the International District of Seattle and the Muckleshoot reservation are proposed for inclusion
- Twenty-six locations reside in areas that score highest in key equity demographic characteristics (see Appendix)
- The vast majority of all King County residents (91.5% of residents) live within 3 miles of a proposed location (see Appendix)

Estimated Costs

Working with the Procurement and Contract Services Division, Elections awarded a contract through an Invitation to Bid (ITB) process for the manufacturing of 37 new ballot drop boxes. The winning bidder, LaserFab LLC, a local metal fabrication vendor, will produce the steel drop boxes to be installed in 2016. The Estimated costs to manufacture, install and wrap the new drop boxes are below:

Item	Quantity	Unit cost	Ext. cost
LaserFab model 5038	37	\$5235	\$193,695
Installation estimate (FMD internal transfer)			\$20,000
Vinyl wrap	40	\$650	\$26,000
Total			\$239,695

Appendix

Ballot drop off locations

A plan to improve voter access

Executive Summary

Removing Barriers to Access

The most important priority for King County Elections (KCE) is removing barriers to the voting process and ensuring that every eligible voter is able to easily and conveniently exercise their right to vote. To advance this priority, KCE has undertaken strategies like advocating for later voter registration deadlines in Olympia, expanding opportunities for voters to access their ballot online, providing election materials in the voter's preferred language and operating ballot drop-off locations to give voters an extra option for returning their ballot without the cost of postage.

Ballot drop boxes have become an important tool for King County voters to participate in an election. At present, King County Elections operates ten permanent ballot drop boxes and twelve temporary vans that provide ballot drop-off opportunities. The number of ballot drop boxes in King County has varied over the last seven years but it is clear that voters have come to rely on this service; in recent elections, approximately 22 percent of all ballots were returned via a ballot drop box.

With the passage of Motion 14491 and subsequent supplemental funding, the King County Council firmly supported expanding the number of ballot drop boxes and more importantly, expanding access and convenience for King County voters. In order to ensure a thorough and intentional process for selecting new drop-off locations, the legislation requested KCE to provide a plan, focusing on the feasibility of using libraries as potential sites, to the County Council by April 30, 2016.

Criteria and Evaluation Process

To study the potential for new ballot drop-off locations, Elections staff made visits to more than 100 sites around King County to assess in-person, the feasibility and desirability of each site. In order to evaluate potential ballot drop box sites in a robust, transparent and comprehensive way, KCE developed a set of criteria against which each location was scored. These criteria included:

- Alignment with Department and County Goals
- Operational Effectiveness
- General Accessibility
- Continuity of Service

Plan Summary, Feasible Locations and Timeline

The plan to improve voter access through increased ballot drop-off locations includes a recommendation to discontinue the use of ballot drop-off vans while adding additional permanent, 24-hour ballot drop boxes to maximize voter convenience. The proposal for additional drop boxes calls for a phased approach in 2016 and lays out options for future locations in 2017. In short, the plan calls for no changes to the ten current ballot drop-off locations (to promote continuity) but makes recommendations for adding nineteen additional boxes in phase one and another 14 boxes in phase two - for a total of forty-three boxes in operation in time for the General Election. Highlights of the plan for increasing voter access through additional ballot drop boxes include:

- Of the forty-three locations deemed feasible for 2016, twenty-four of them are located at public libraries.
- Six locations are located in unincorporated King County.
- Geographically isolated communities of Vashon Island, Southeast King County and East King County are proposed for inclusion.
- Culturally distinct communities in the International District of Seattle and the Muckleshoot Reservation are proposed for inclusion.
- Twenty-six proposed locations are in areas that score highest in key equity demographic characteristics (see Appendix).
- The vast majority of King County residents (91.5% of residents) live within 3 miles of a proposed location (see Appendix).

Major milestones for the recommended proposal:

- April 14: KCE submits Ballot Drop-off Location plan to Council
- April 14 – May 14: Council review and consideration of plan
- June: Proposed phase I drop boxes installed
- July 14: Primary election voting begins (29 ballot drop boxes open)
- September: Proposed phase II drop boxes installed
- October 20: General Election voting begins (43 drop boxes open)

Next Steps

The plan proposes specific locations based on the evaluation process and is contingent on agreements with property owners and Council approval. The plan calls for the use of 24 public library-based locations. KCE has proposed submitting an addendum to this report by July 1, 2016 with a final list of proposed Phase II locations once site agreements are in place.

Introduction

Original Ballot Drop Box Legislation

On June 19, 2006 the King County Council enacted Ordinance 15523, which moved the County to a vote-by-mail system of elections. The ordinance also directed the Executive to provide a report on the proposed cost, locations and security measures required to operate regional voting centers and ballot drop boxes.

The Executive formed an advisory committee and ultimately issued a report that was approved in 2008 by Motion 12820. In the report the committee recommended 36 ballot drop-off locations, all of which were either King County Library System locations or City of Seattle Neighborhood Service Centers.

Drop Box Program, 2008 – Present

Starting in 2008, and pursuant to the approved plan, King County Elections piloted eight ballot drop boxes for the Primary and General Elections in order to begin the transition to vote-by-mail. However, as a result of service cuts made in the 2010 budget process, the number of ballot drop boxes was reduced to just two - the minimum requirement under Washington Administrative Code 434-250-320. At that time, community stakeholders expressed concern over this minimal number of drop boxes. In response, twelve ballot drop boxes were restored in time for the General Election in 2010.

In order to meet the increased voter demand during the Presidential Election in 2012, KCE piloted temporary ballot drop-off vans for the first time. The temporary van locations were successful and in 2013 nine additional vans were added. Today, King County Elections operates ten permanent ballot drop-off locations and operates twelve vans during each Countywide election. The ten current locations are listed below.

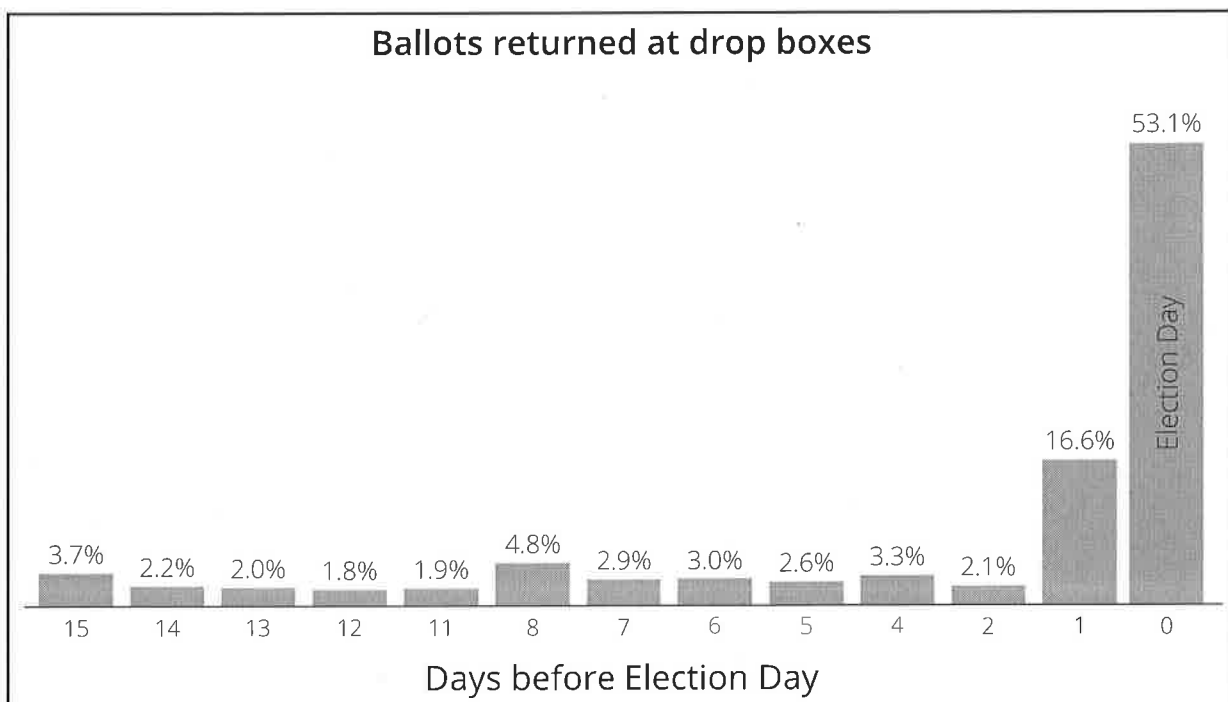

- Ballard Library
- Burién City Hall
- Crossroads Shopping Center
- Federal Way City Hall
- Issaquah City Hall
- King County Administration Building
- King County Elections Building
- Lake Forest Park City Hall
- Redmond City Hall
- Regional Justice Center

During each election, the location of every ballot drop box is advertised on King County Elections' website, a list is included as an insert with the ballot packet mailed to each voter and a list is published in the Local Voters' Pamphlet mailed to each King County household.

Ballot Drop Off Locations: A Plan to Increase Access and Convenience

In a vote-by-mail environment, the United States Postal Service is a key partner in delivering ballots to voters. However, USPS requirements may limit voter options and convenience when it comes to returning a ballot. There can be confusion about postmarks, pick-up deadlines, post office locations and postage requirements. Also, some voters have reported mistrust about returning their ballot through the postal system.

Consequently, ballot drop boxes have become a useful option for many King County voters. During the last four general elections, for example, 22% of ballots were returned via drop box. The usefulness of drop boxes is especially evidenced by their popularity in the last days of the voting period. Approximately 70% of all ballots returned to a drop box are deposited on Election Day or the day before. (See chart below)

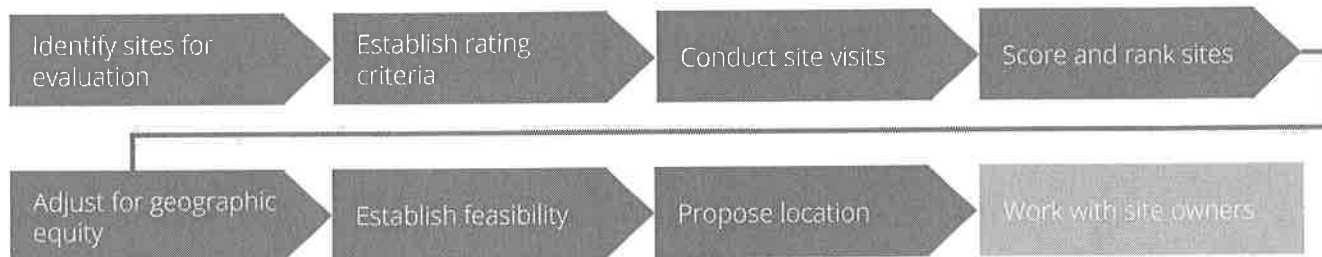

It is a priority for the Department of Elections to improve access to and the convenience of voting. Adding additional ballot drop-off locations will improve access and make voting more convenient to more voters in King County. To that end, Elections has undertaken a project to evaluate sites around King County and measure the feasibility of each one to serve as a new ballot drop-off location. The remainder of this document reports on the results of our evaluation and includes a list of proposed new sites to be installed in 2016.

Site Feasibility Analysis

Evaluation Methodology

The graphic below illustrates the process Elections went through in order to reach the proposed list of locations.

Identifying Potential Sites

In order to establish the relative feasibility of potential ballot drop-off locations Elections began by identifying sites for evaluation. Sites were pulled from various sources including:

- Motion 14491 which requested the consideration of public libraries
- The list of current sites
- Suggestions from local jurisdictions and community partners
- Suggestions from the voting public
- Suggestions from the King County Council and the Executive's Office

Based on these sources, our office compiled a list of over 100 locations to evaluate.

Criteria Development

In order to evaluate the feasibility of potential sites, many factors were taken into consideration. A set of specific criteria was developed to measure and score each potential location. We developed this set of criteria with input from key stakeholders such as: the Citizen's Election Oversight Committee (CEOC), the King County Office of Equity and Social Justice (ESJ), King County Council members and staff, the Seattle Public Library and King County Library System and residents representing Limited English Speaking communities.

A short description of the factors and criteria follows:

One factor we considered was how closely a potential site could advance or ***align with an existing County and Department goal***. With assistance from the County's ESJ Office, we assessed the impact of drop box placement in communities that have been traditionally under-served or underrepresented. We also analyzed election data in order to identify areas with lower voter participation levels.

Another general factor we considered was ***Operational Effectiveness***. We established a set of specific criteria based on election administration requirements around picking up ballots and closing drop boxes on Election Day, along with other logistical, safety and security needs.

A third factor was centered on criteria around **Accessibility**; taking into account issues such as access and proximity to public transit, location visibility and traditional accessibility considerations.

The last factor was **Continuity of Service**; we rated sites based on their history of service as a ballot drop-off location to promote continuity and avoid reductions of established service to communities where ballot drop off locations are already located.

Visiting and Scoring Sites

Between February 22 and March 31 of this year Elections staff conducted site visits to over 100 locations around King County. Staff documented existing conditions, noting any potential challenges or opportunities at each sites. Once site visits were complete, each location was rated on thirteen different criteria and a cumulative score was derived for each location.

Description of Criteria and Scoring

Alignment with Department and County Goals

Criteria	Score	Description
Serving isolated communities Does the location reside in a geographically isolated area or serve a culturally distinct community? Example: unincorporated KC, tribal communities, Vashon Island, SE King County, etc.)	10	The site is designated as isolated or located in unincorporated King County.
	0	The site is not designated as isolated or in an incorporated city or town.
Providing equitable services Does the location reside in a community with demographic characteristics that warrant equity considerations? Using an established ESJ metric to score an area's combination of diversity, household income, and English proficiency. Scores are grouped into quintiles.	10	Highest quintile score.
	7	Second highest quintile.
	3	Third highest quintile.
	0	Fourth highest quintile.
	0	Lowest quintile score.
Disparities in voter participation Is the site located in an area that has lower than average voter registration rates?	8	Adjacent to census tract with lower than average voter registration rates.
	4	Lower than average voter registration rates.
	0	Average or higher than average voter registration rates.
Responsible growth Proximity to Puget Sound Regional Council designated regional centers	2	Within a designated "regional center".
	0	Outside a designated "regional center".

Operational Effectiveness

Criteria	Score	Description
<p>Ballot pick-up/box closing Does the site support an effective, safe and secure ballot pick-up and box closing process for KCE? Examples: stairs or inclines on the path(s) to/from box, potential to place a box in close proximity to parking, etc.</p>	10	Site conditions present no challenges to the daily ballot pick-up or box closing process.
	5	Site conditions may present a challenge to the daily ballot pick-up or closing process but can be mitigated.
	0	Site conditions do not support an effective daily ballot pick-up or box closing process.
<p>Site owner input Are there site owner concerns regarding increased traffic flow that would negatively affect existing site tenant(s)? Are there known or planned construction projects on site (or near) that might impact the accessibility or feasibility of the site?</p>	5	There are no site owner concerns.
	2.5	There are site owner concerns that can be mitigated by KCE.
	0	Site owner concerns or site conditions do not support an effective ballot drop-off location.
<p>Drive-up option Do site conditions support both walk-up and drive-up ballot deposit options for voters? Drive-up options offer more convenience to voters.</p>	5.5	Site conditions, as they presently exist, can support a drive-up option.
	2.5	Site conditions could support a drive-up option but doing so might impact host property.
	0	Site conditions do not support a drive-up option.
<p>End-of-Line Does the site support effective control of traffic (both vehicular and pedestrian) to establish "on-time" and "end-of line" status at the voting deadline? Examples: size of the usable area adjacent to the box (to establish orderly queuing), the ability to limit the number of clear paths to the box.</p>	5	Site conditions present no challenges to establishing end-of-line status.
	2.5	Site conditions present some challenges to establishing end-of-line status.
	0	Site conditions do not support an effective end-of-line establishment process.

Accessibility

Criteria	Score	Description
Visibility Does the site allow for placement of a box that is readily visible and easy to locate by voters? Conditions include: lighting, a clear line of sight from street and/or parking	5	Voters can easily locate the box on site; is fully visible from multiple directions.
	2.5	Some voters may be challenged to find the box without extra signage or lighting.
	0	There may be challenges in finding the box on site due to placement or visibility.
Access to Public Transit Can voters visit the location via public transit? Conditions evaluated include: the number of modes of public transit available at the site and distance from public transit stops/stations.	5	Served by multiple bus lines or modes of public transit; transit stops within 1000 ft.
	2.5	Served by one bus line or mode of public transit or stop/station is >1000 ft away.
	0	The site is not served by public transit.
Parking Does the site possess adequate parking for voters? Example: number of parking spots, dedicated parking vs shared parking spots, distance from parking to box and off-street parking in dense locations.	5.5	Adequate parking option.
	2.5	One or more challenge(s) to parking (< 20 parking spots, limited load/unload options, distance to box exceeds 100ft).
	0	Inadequate parking (pay parking, no load/unload, distance to box exceeds 200ft).
ADA factors Does the site possess all accessible features possible? Conditions evaluated include: parking lot slope, turning radius adjacent to box placement, curb cuts, number of ADA parking spots, unimpeded path to box from ADA parking	5	Site conditions support 100% accessibility.
	2.5	Adequate with some mitigation.
	0	Site does not support accessibility.

Continuity of Service

Criteria	Score	Description
Location History Does the site have a history of serving as a ballot drop-off location?	20	The site currently serves as an existing ballot drop box.
	10	Site is a current van location or would serve as a permanent replacement for a current van location.
	0	All other sites.

Ranking Sites

The following table is a list of each location that was evaluated and its final score according to our criteria, sorted by King County Council district. The list also documents each location's feasibility (either a simple yes or no) and includes corresponding notes, if applicable. Notes are generally a short explanation of why a site may have been scored highly but not proposed as a potential new location.

Adjusting for Geographic Equity and Establishing Feasibility

Based on scores in the preceding table there are many sites that are desirable as potential ballot drop-off locations. However, to achieve a comprehensive and practical list of locations, other considerations were factored in: namely, geographic equity and site owner input. Our plan to increase voter access includes a combination of feasible locations that are geographically dispersed and have a high likelihood of working for site owners. A summary of our proposed plan is below:

1 10 current drop box locations – our plan proposes no changes to current locations*

- Ballard Library
- Burien City Hall
- Crossroads Shopping Center
- Federal Way City Hall
- Issaquah City Hall
- King County Administration Building
- King County Elections Building
- Lake Forest Park City Hall
- Redmond City Hall
- Regional Justice Center

2 12 locations rated as desirable and feasible; we propose installing boxes at these sites before the Primary (these locations are intended to replace old van locations)

- Auburn Library
- High Point Library
- Kirkland City Hall
- Lake City Library
- NewHolly Library
- Sammamish City Hall
- Shoreline Library
- Tahoma School District Building
- University of Washington
- Valley View Library
- White Center Library
- Woodinville Library

3 7 additional locations rated as desirable and feasible; we propose installation before the Primary

- Algona-Pacific Library
- Bellevue Regional Library
- Broadview Library
- Enumclaw Library
- Fairwood Library
- Green Lake Library
- Skyway Library

4

14 additional locations rated as feasible or desirable; we propose installation of the 8 feasible and further exploration of the 6 desirable in time for the General Election

- Beacon Hill Library
- Bothell Regional Library
- Capitol Hill (TBD)
- Chinatown/International District (TBD)
- Covington Library
- Highline College (TBD)
- Kent East Hill (TBD)
- Kingsgate Library
- Muckleshoot Library
- Rainier Community Center (TBD)
- Renton Highlands (TBD)
- Snoqualmie Library
- South Park Library
- Vashon Library

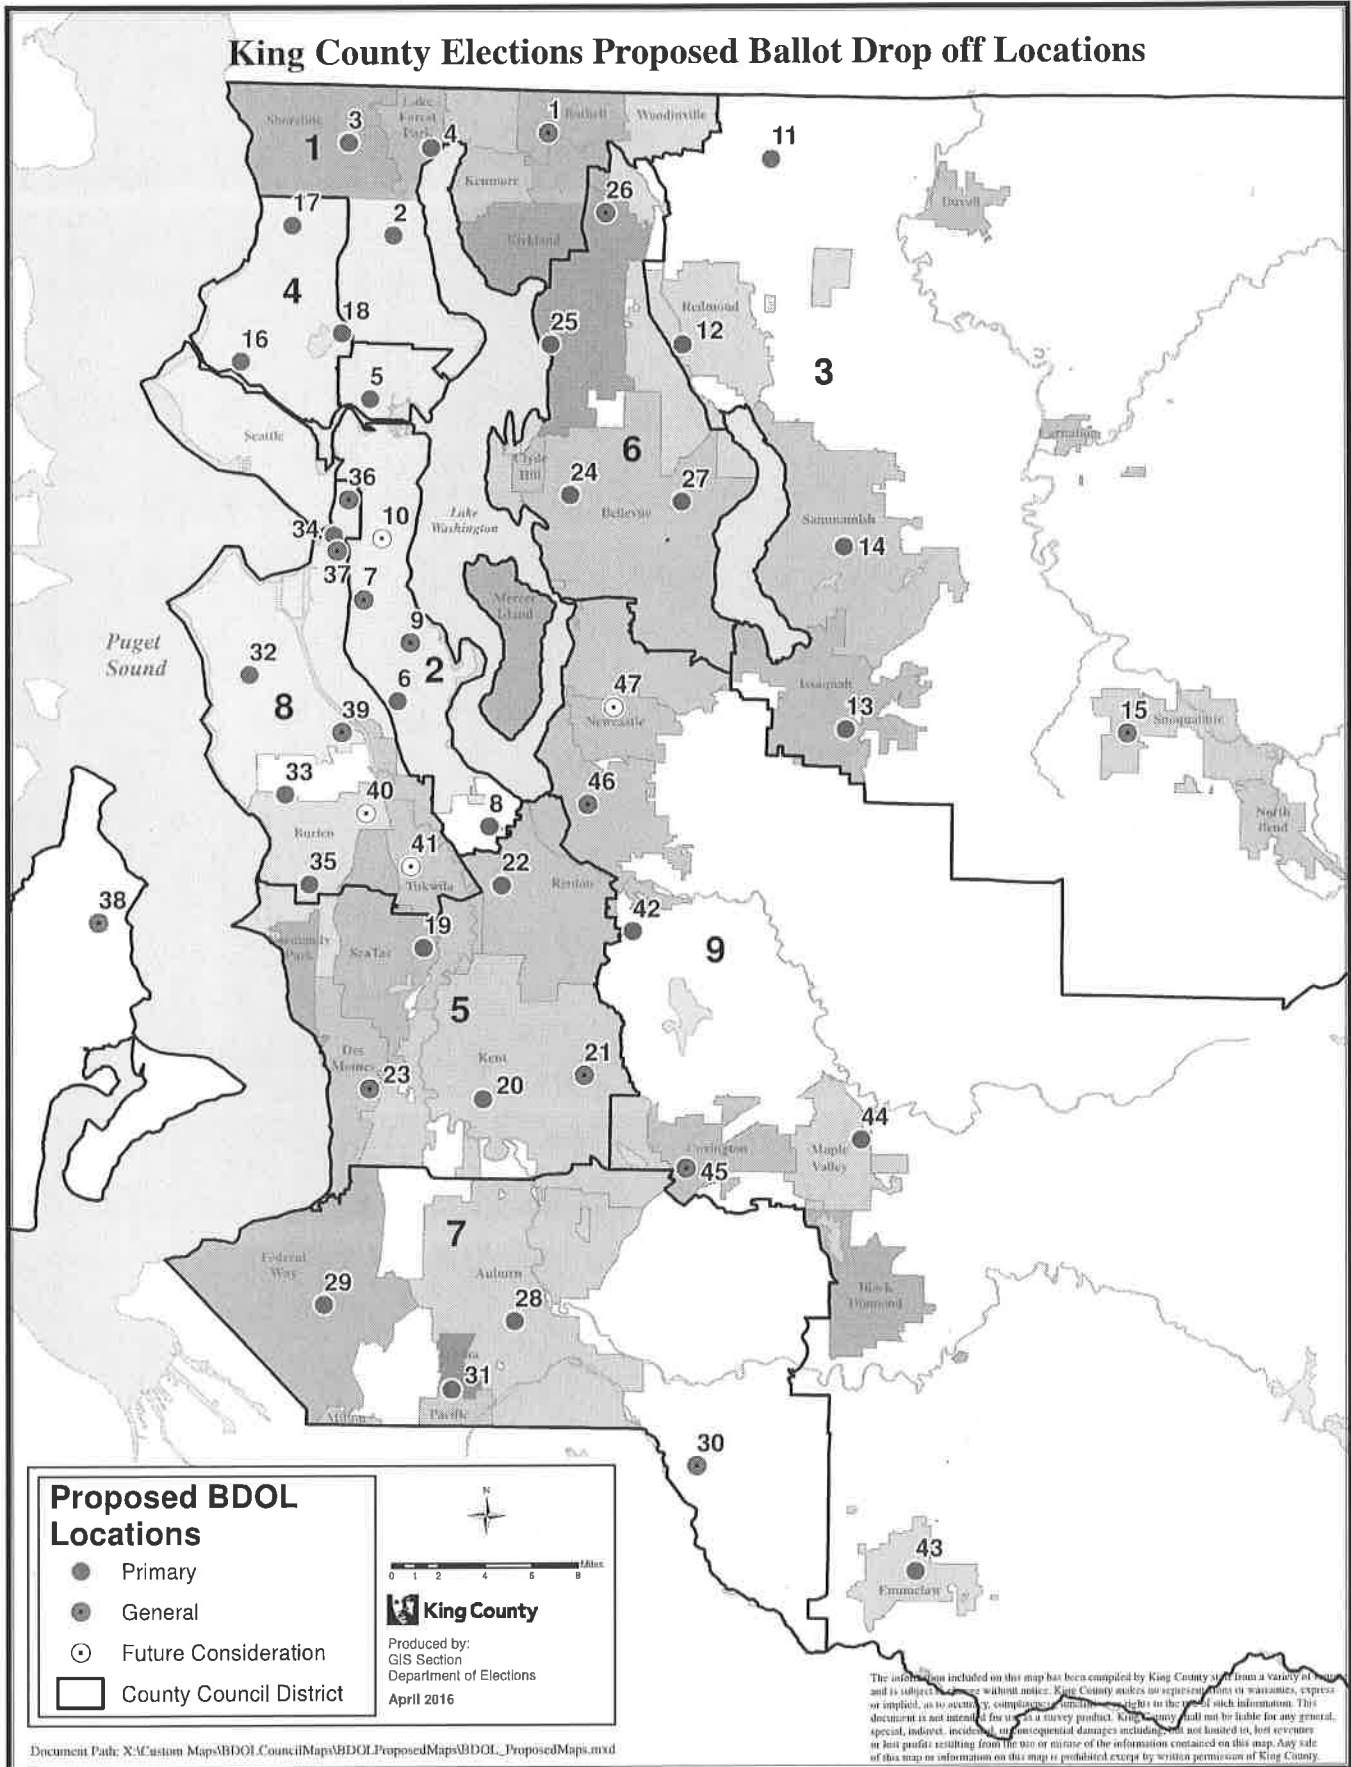

5

4 other locations rated as feasible but not available in 2016. We propose re-evaluation in 2017

- Boulevard Park Library
- Douglas Truth Library
- Foster Library
- Newcastle Library

** The current boxes used at our ballot drop-off locations all have differing levels of wear and tear. We will assess the condition of each drop box and replace the boxes that are in need of physical replacement. We anticipate extending the useful life of the several existing boxes that are shielded from weather and can still function without any operational concerns.*

Proposed Locations

Legend of proposed locations

1. Bothell Regional Library
2. Lake City Library
3. Shoreline Library
4. Lake Forest Park City Hall
5. University of Washington

31. Algona-Pacific Library
32. High Point Library
33. White Center Library
34. KC Administration Building
35. Burien Library/Burien City Hall
36. Capitol Hill (TBD)
37. International District (TBD)
38. Vashon Library
39. South Park Library
40. Boulevard Park Library
41. Foster Library
42. Fairwood Library
43. Enumclaw Library
44. Tahoma School District Bldg.
45. Covington Library
46. Renton Highlands (TBD)
47. Newcastle Library

Summary of Feasible Locations

The specific combination of feasible locations in the current plan balance geographic dispersion, convenience and equity. Highlights of the plan for increasing voter access through additional ballot drop boxes include:

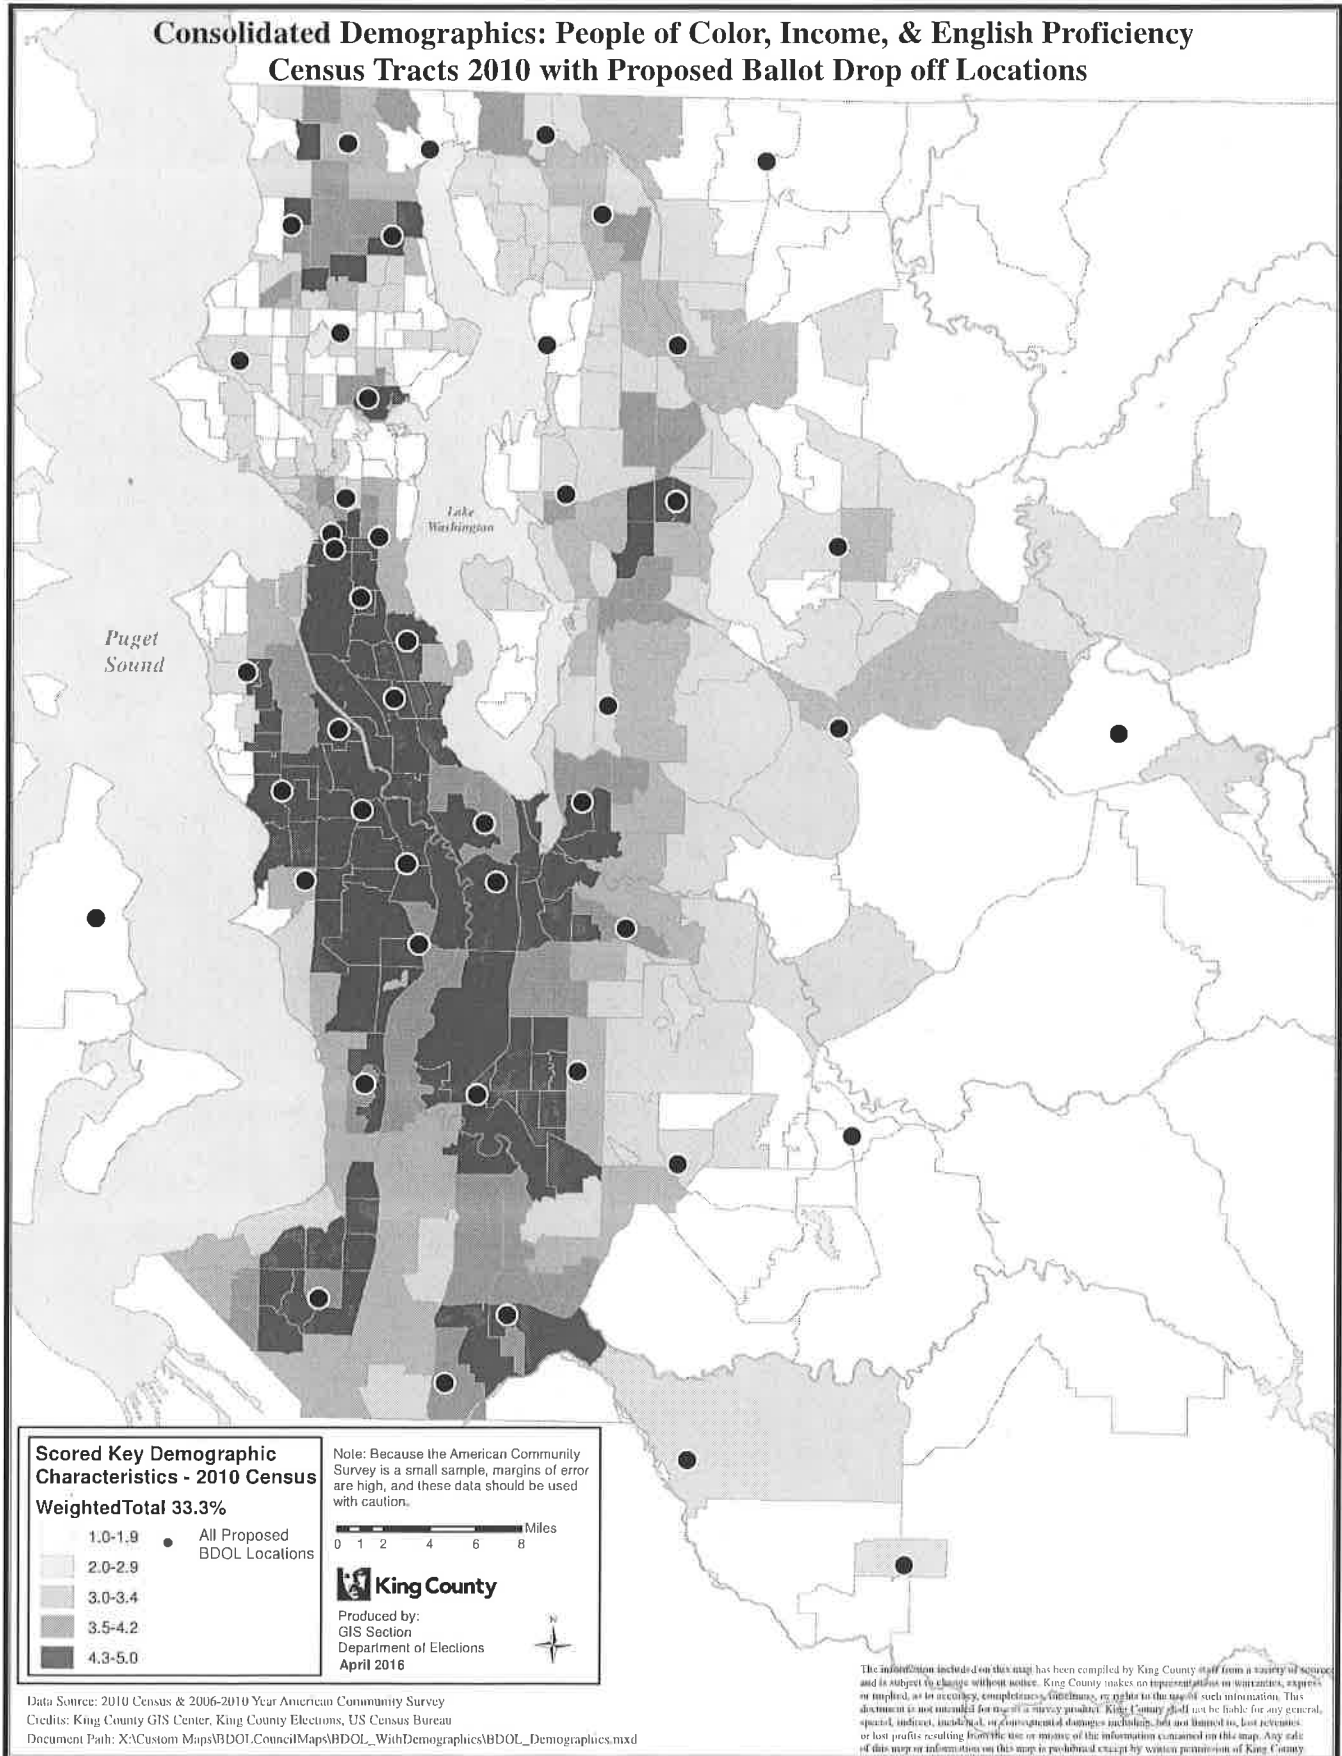

- Of the forty-three locations deemed feasible for 2016, twenty-four of them are located at public libraries
- Six locations are located in unincorporated King County
- Geographically isolated communities on Vashon Island, SE King County and East King County are proposed for inclusion
- Culturally isolated communities in the International District of Seattle and the Muckleshoot reservation are proposed for inclusion
- Twenty-six locations reside in areas that score highest in key equity demographic characteristics (see Appendix)
- The vast majority of all King County residents (91.5% of residents) live within 3 miles of a proposed location (see Appendix)

Estimated Costs

Working with the Procurement and Contract Services Division, Elections awarded a contract through an Invitation to Bid (ITB) process for the manufacturing of 37 new ballot drop boxes. The winning bidder, LaserFab LLC, a local metal fabrication vendor, will produce the steel drop boxes to be installed in 2016. The Estimated costs to manufacture, install and wrap the new drop boxes are below:

Item	Quantity	Unit cost	Ext. cost
LaserFab model 5038	37	\$5235	\$193,695
Installation estimate (FMD internal transfer)			\$20,000
Vinyl wrap	40	\$650	\$26,000
		Total	\$239,695
