The recommended PBRs area, 2.78 acres, excludes a portion of parcel #9008 that is impacted by a neighbor's use – if credit for the restoration category is awarded, then the recommended acreage would be 2.99 acres.

STR: SW-16-22-03

2. Except as modified herein, the facts set forth in the King County Department of Natural Resources, Water and Land Resources Division preliminary report to the King County Hearing Examiner for the April 30, 2003, public hearing are found to be correct and are incorporated herein by this reference. Copies of the said report will be attached to the copies of this report submitted to the King County Council.
3. The total recommended acreage stated within the Division report is corrected to read 2.78 acres, and the total recommended acreage with approval of the restoration plan is corrected to read 2.99 acres.

CONCLUSIONS:

1. Approval of current use valuation for 2.78 acres of the subject property, pursuant to the Public Benefit Rating System adopted by King County Ordinance No. 10511, as amended, would be consistent with the purposes and intent of King County to maintain, preserve, conserve and otherwise continue in existence adequate open space lands and to assure the use and enjoyment of natural resources and scenic beauty for the economic and social well-being of King County and its citizens.
2. Timely application has been made to King County for the current use valuation of the subject property to begin in 2004. Notice of said application was given in the manner required by law.
3. The subject property contains priority open space resources and is entitled to bonus points pursuant to the King County Public Benefit Rating System, which justify a total award of 20 points, contingent upon the recording of an approved conservation easement by the end of 2003. The resulting current use value is 30% of market value for 2.78 acres of the subject property. Should a conservation easement not be approved and recorded by the end of 2003, total award points will decrease by 5 and the percent of market value will be adjusted accordingly.
4. Credit for the Resource Restoration category may be added administratively contingent upon Applicant submission of a restoration plan by September 1, 2003, and County approval of the plan by October 1, 2003. Credit for this category will increase the acreage from 2.78 to 2.99 acres, add 5 points to the total award and adjust the percent of market value accordingly.

RECOMMENDATION:

APPROVE the request for current use valuation of 30% of market value for 2.78 acres of the subject property, subject to the conditions recommended in the Department of Natural Resources report for the April 30, 2003, public hearing and the following additional conditions of approval:

1. An approved conservation easement shall be recorded by December 31, 2003. Failure to meet this requirement will decrease the total award by 5 points.
2. The qualifying acreage may be increased administratively to 2.99 acres and the current use valuation adjusted accordingly if a restoration plan is submitted by September 1, 2003, and approved by the County by October 1, 2003. Upon approval, a yearly monitoring report will be submitted to the King County Office of Rural and Resource Programs or its successor describing the progress and success of the restoration, including photographs.

Current use valuation shall be subject to all terms and conditions of RCW 84.34 and King County Code Chapter 20.36, as the same may be amended from time to time, and all regulations and rules duly adopted to implement state law and county ordinances pertaining to current use valuation.

RECOMMENDED this 20th day of May, 2003.
