Bonus category

STR: SE 06-22-03
Zoning: RA-5
Parcel no.: 062203-9093
Total acreage: 6.88 acres
Recommended PBRS: 5.20 acres

(The land area recommended for PBRS enrollment is the entire parcel less the excluded area, which is what has been calculated by DNRP. In the event the County Assessor's official parcel size is revised, the PBRS acreage shall be administratively adjusted to reflect that change.)

2. Except as modified herein, the facts set forth in the King County Department of Natural Resources & Parks, Water and Land Resources Division, Preliminary Report for the November 19, 2008, public hearing are found correct and are incorporated herein by reference. Copies of the department report will be provided with the copies of this report submitted to the Metropolitan King County Council.
3. Timely application was made to King County for PBRS current use valuation of the subject property to begin in 2010. Notice of the application was given as required by law.

4. Award for the farm and agricultural conservation land category is contingent upon submittal by the King County Conservation District of a farm management plan for the subject property by August 1, 2009.
5. Contingent on submittal of a farm management plan, the property contains priority open space resources and is eligible for a total award of five points under the King County Public Benefit Rating System. The resulting current use valuation therefore would be 50% of market value for 5.2 acres of the property.
6. Credit for each of the categories noted below may be awarded administratively upon approval of either the farm management plan and/or a separate resource restoration plan incorporating the following category specific requirements:
 - A. Aquifer protection area. The pertinent plan must address the native species reforestation, management and maintenance of the area outlined in green on the aerial map attached to exhibit no. 4.
 - B. Buffer to public land. The pertinent plan must address the native species reforestation, management, and maintenance of the area outlined in green on the aerial map attached to exhibit no. 4.
 - C. Watershed protection area. At least 1.72 acres of the property must be reforested.
 - D. Resource restoration. A resource restoration plan must be submitted by July 1, 2009, and approved by August 1, 2009, that addresses the native species reforestation, management and maintenance of the area outlined in green on the aerial map attached to exhibit no. 4.

Award for the above categories would increase the point total by five points each, with the exception of the buffer to public land category which would increase the point total by three points, with the current use valuation for the enrolled portion of the property adjusted accordingly to as low as 20%.

CONCLUSIONS:

1. Credit for each of the aquifer protection area, buffer to public land, watershed protection area, and resource restoration categories is conditional on approval and implementation of either a farm management plan and/or a separate resource restoration plan and upon meeting the specific requirements outlined for each category as stated in Finding no. 6 above. Credit for the buffer to public land category would increase the point total by three points and the remaining categories would increase the point total by five points each, with the current use valuation for the enrolled portion of the property being adjusted accordingly.
2. Contingent upon submittal of a farm management plan, approval of current use valuation of 50% (or as low as 20% if approved as noted above in Finding no. 6) of market value for 5.2 acres of the property pursuant to the Public Benefit Rating System adopted by Chapter 20.36 KCC would be consistent with the purposes and intent of King County to maintain, preserve, conserve and otherwise continue in existence adequate open space lands and to assure the use and enjoyment of natural resources and scenic beauty for the economic and social well-being of King County and its citizens.

RECOMMENDATION:

APPROVE current use valuation of 50% of market value (or as low as 20% if approved as noted below) for 5.2 acres of the subject property, subject to the conditions recommended in the Department of Natural Resources & Parks report for the November 19, 2008 public hearing, the above-noted contingency and the following conditional approvals:

1. Credit for each of the categories noted below may be awarded administratively upon approval of either the farm management plan and/or a separate resource restoration plan incorporating the following category specific requirements:
 - A. Aquifer protection area. The pertinent plan must address the native species reforestation, management and maintenance of the area outlined in green on the aerial map attached to exhibit no. 4.
 - B. Buffer to public land. The pertinent plan must address the native species reforestation, management, and maintenance of the area outlined in green on the aerial map attached to exhibit no. 4.
 - C. Watershed protection area. At least 1.72 acres of the property must be reforested.
 - D. Resource restoration. A resource restoration plan must be submitted by July 1, 2009, and approved by August 1, 2009, that addresses the native species reforestation, management and maintenance of the area outlined in green on the aerial map attached to exhibit no. 4.

Award for the above categories would increase the point total by five points each, with the exception of the buffer to public land category which would increase the point total by three points, with the current use valuation for the enrolled portion of the property adjusted accordingly.

Current use valuation shall be subject to all terms and conditions of RCW Chapter 84.34 and KCC Chapter 20.36, as may be amended from time to time, and all regulations and rules duly adopted to implement state law and county ordinances pertaining to current use valuation.

RECOMMENDED February 19, 2009.
